✓ Exclusively available on IvyPanda

There are a few issues that should be explored after watching a series of films and researching the topic of ageism. First, there are several themes in the material about how adolescents are positioned in society. Almost all scientific ideas on how society implies the doctrine of youth's perfection, without exception, promote ageism (ChangingAging, 2018). They are preoccupied with decline and pay little attention to the continuous emergence of new abilities and capabilities (GreggU, 2018). Scholars' incapacity to adequately understand aging is due to their tunnel vision (GreggU, 2018). Thus, such an attitude leads to different consequences, such as phased retirement, which is one of the implications of such discourse against the elderly. A human resources technology allows full-time employees to work part-time schedules while drawing retirement benefits (GreggU, 2018).

In terms of evidence presented in the films, it is mainly based on numerical sources. According to the Age Discrimination Laws (2018) video, the key "but-for" was reflected by the age of employees in the Gross v. FBL Financial Services report from 2009. In addition, the U-curve of happiness is a result of such practice (TED, 2017). According to this theory, life satisfaction declines around middle age, recovers at about 50, and peaks at the end of life (TED, 2017). The paradox of aging has been coined to describe this baffling phenomenon. This trend severely impacts the people and companies, who lose productive employees sooner than they should (TED, 2017). As a result, such outcomes are detrimental to the social group of the elderly, and there are further data to back up that assertion.

The statistics that support such theories are present in the analyzed videos. An example is a variation in population percentages between 2015 and 2050, which is assumed if no policy changes are made (TED, 2017). Following its contents, it is evident that in the middle of the 21st century, there will be almost two billion people aged over 60. As a result, ageism can lead humanity to economic, social, and cultural chaos in case no changes are applied as soon as possible.

**Christianity and sex problems** Hugh Northcote,1906 *Freud and Modern Society* Bocock,2013-04-17 by Ronald Fletcher To devote a volume to Freud in a series on The Making of Sociology might seem to some readers very strange Freud they might argue was not only and very explicitly a psychologist but also and equally explicitly a clinical psychologist whose most immediate preoccupation was that of trying to cure the mental illnesses of his patients Furthermore he was a psychologist who insisted on relating his theories as closely as possible to biological and physiological facts All this of course is true But to adopt this view as one which distinctly marks Freud off from sociology is a basic mistake and one which shows how sadly subjects which were once seen as being essentially interrelated have been forced into false separation by the current vogue of specialization necessary and correct when it is soundly conceived but intellectually disastrous when it is not It is worthwhile to recall that all the major thinkers who contributed to the making of sociology from Comte and Spencer to Ward Giddings Tonnies Durkheim Hobhouse Weber Simmel Pareto this could be a very long list I were in fact convinced about the close relationships between biology psychology and sociology The same is true of all the major anthropologists The simple truth is that all these men were critically and creatively participating in the revolution which was taking place in man's approach to his knowledge of nature and of his own nature and place within it **The Book of Life** Upton Sinclair,1922

makes it vulnerable to problems that would not be social problems in poorer societies The Handbook explores the theory of the weakness of the strong in other words strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies This theory is clearly illustrated in this volume by the aftermath of September 11 2001 depicting the vulnerability of the U S to social problems in far removed corners of the world In addition the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems ecological problems global inequality health as a social problem and much more The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library
