**Into the Valley of Death** Nick Thomas, 2021-06-09 Unique work that details the status of each man known to have taken an active part in the Charge listing the evidence supporting their case for inclusion among the ranks of the immortal Light Cavalry Brigade Into the Valley of Death tells the thrilling story of the Charge of the Light Brigade in the words of the men who fought during the most heroic and yet futile engagement of the modern era By drawing on key evidence the author has not only provided a clear narrative of the events leading up to the 25th October 1854 but has painted a vivid picture of the Charge itself No punches are pulled and the carnage which ensued is clear for all to read dispelling the romantic myth of death or glory fostered by the Victorians This work tells the blood and guts story of a desperate charge by 673 men in the face of what seemed insurmountable odds It reveals the trauma endured by the rank and file who witnessed all around them men and horses cut to pieces while endeavoring to ride through walls of flying iron and lead and not knowing if the next second would be their last Yet in the midst of this horror and devastation the author takes time to give an overview of the battle itself and puts on the hats of some of the commanders involved looking at not only what they did but also at how a terrible disaster could so easily have been turned into the greatest single victory of its time Could such an apparently mad cap charge have succeeded Did sufficient men arrive at the guns to successfully capture them Were there troops and close support that could have been utilized to drastically change the course of events Could a simple stalling tactic have allowed these resources to have been fully exploited All of these questions are answered This work truly lifts the lid on the events of over 150 years ago and through the words of the survivors allows the reader to assign the responsibility for the Charge having taken place and for the consequent loss of the Light Brigade

M. Mody, 2016-12-09 How beginning in the mid 1960s the US semiconductor industry helped shape changes in American science including a new orientation to the short term and the commercial Since the mid 1960s American science has undergone significant changes in the way it is organized funded and practiced These changes include the decline of basic research by corporations a new orientation toward the short term and the commercial with pressure on universities and government labs to participate in the market and the promotion of interdisciplinarity In this book Cyrus Mody argues that the changes in American science that began in the 1960s co evolved with and were shaped by the needs of the civilianized US semiconductor industry In 1965 Gordon Moore declared that the most profitable number of circuit components that can be crammed on a single silicon chip doubles every year Mody views Moore's Law less as prediction than as self fulfilling prophecy pointing to the enormous investments of capital people and institutions the semiconductor industry required the long arm of Moore's Law that helped shape all of science Mody offers a series of case studies in microelectronics that illustrate the reach of Moore's Law He describes the pressures on Stanford University's electrical engineers during the Vietnam era IBM's exploration of alternatives to semiconductor technology the emergence of consortia to integrate research across disciplines and universities and the interwoven

development of the the molecular electronics community and associated academic institutions as the vision of a molecular computer informed the restructuring of research programs

**Grit and Gold** Jean Johnson, 2018-11-01 No other Western settlement story is more famous than the Donner Party's ill fated journey through the Sierra Nevada Mountains But a few years later and several hundred miles south another group faced a similar situation just as perilous Scrupulously researched and documented Grit and Gold tells the story of the Death Valley Jayhawkers of 1849 and the young men who traveled by wagon and foot from Iowa to the California gold rush The Jayhawkers journey took them through the then uncharted and unnamed hottest driest lowest spot in the continent now aptly known as Death Valley After leaving Salt Lake City to break a road south to the Pacific Coast that would eliminate crossing the snowy Sierra Nevada the party veered off the Old Spanish Trail in southern Utah to follow a mountaineer's map portraying a bogus trail that claimed to cut months and hundreds of miles off their route to the gold country With winter coming however they found themselves hopelessly lost in the mountains and dry valleys of southern Nevada and California Abandoning everything but the shirts on their backs and the few oxen that became their pitiful meals they turned their dreams of gold to hopes of survival Utilizing William Lorton's 1849 diary of the trek from Illinois to southern Utah the reminiscences of the Jayhawkers themselves the keen memory of famed pioneer William Lewis Manly and the almost daily diary of Sheldon Young Johnson paints a lively but accurate portrait of guts grit and determination
