Women, Feminism, and Femininity in the 21st Century B. Mousli, E. Roustang-Stoller, 2009-05-11 American women look at French women as having it all sex motherhood work and public office while French women look at American women as puritanical excessively feminist and unable to have it all without guilt The essays in this book by leading American and French academics and critics set the record straight by assessing the truth of each outlook They conclude that facts are different from imagination and that on many issues French feminists could actually look to the U S for inspiration This book offers the first comparative critical appraisal of how women live in the US and in France and suggests paths of reflection on what women can do to improve their lives in the twenty first century This is a must read for anyone interested in the nature of womanhood today in the Western World

Women in Combat Lorry M. Fenner, Marie E. deYoung, 2001-08-09 Women have been actively involved the United States military for more than fifty years but the ban on their participation in combat remains a hotly debated issue In this provocative book Lorry M Fenner an active duty Air Force intelligence officer calls for opening all aspects of military service to women Marie deYoung a former Army chaplain argues that keeping women out of combat is in the best interests of both sexes and crucial to the effectiveness of the military as a whole Fenner bases her argument for inclusion of women on the

idea that democracies require all citizens to compete in public endeavor and share in civic obligation She contends that historically reasons for banning women from combat have been culturally biased She argues that membership in a combat force should be based on capability judged against appropriate standards Moreover she maintains that excluding women hampers the diversity and adaptability that by necessity will characterize the armed forces in the twenty first century In contrast deYoung declares that the different physical fitness standards for men and women would in combat lower morale for both sexes and put women at risk of casualty Further she contends that women have neither the physical or emotional strength to endure the overall brutality of the combat experience She also asserts that calls for lifting the combat ban are politically motivated and are inconsistent with the principles of American democracy and the mission of national defense With each author responding to the views of the other their exchange offers a valuable synthesis of the issues surrounding a longstanding debate among policymakers military personnel and scholars of both military history and women s studies

revitalized labor movement a newly energized left and left center coalitions in the social change process remains to be seen
