Risk Management in Outer Space Activities Maria A. Pozza, Joel A. Dennerley, 2022-02-09 Risk Management in Outer Space Activities assesses selected risks associated with space activities from an Australian and New Zealand perspective The book explores the rise of commercial space activities and considers the development of Australia and New Zealand s regulatory frameworks and how they are equipped to address new and emerging risks in the space sector The book examines the juxtaposition of international space law against the domestic legal regimes of Australia and New Zealand and how these regulatory frameworks are designed to create governance mechanisms to control space risk Both national jurisdictions approach space risk from the perspective of liability and international legal obligations but as a result of their different historical space trajectories their risk approaches differ This is illustrated by research that suggests that from an Australian point of view much of its space industry development has been influenced by Cold War era military and national security concerns On the other hand the New Zealand perspective is grounded on the rapid market led commercial development that is currently underway in the country The book examines a variety of risks that can and do emerge in the course of undertaking space activities It does this by presenting a series of space risk case studies There are chapters devoted to examining commercial space risks space insurance the risks posed by space debris cybersecurity and space assets light pollution as a risk for astronomy and the risks inherent in landing objects on the Moon The work contained in this book

is intended to provide a clear practical and informed approach to understanding risk management in outer space activities It will appeal to policy makers risk professionals space lawyers national space agencies as well as academics researchers and students

Dark Skies: Select Readings in Therapeutic Astrology Brad Kochunas,2024-06-28 The title of this book Dark Skies comes from the idea that during the day we are often blinded by the metaphorical light of ego and self interest It is the vast blackness of the night sky that allows us to peer more deeply into the presence of the planetary deities that inhabit not only the heavens but also our internal world as portrayed in our astrology charts Therapeutic astrology is a vibrant branch within humanistic astrology where we view imaginal gods like Venus goddess of love Mars god of war and Pluto lord of the Underworld at play in our lives and discover what their claims may be upon us This sensitive collection of thought provoking essays draws together much of Brad Kochunas work which has appeared online and in a wide variety of publications Astrologers working with clients on a therapeutic basis will find much here to contemplate and to enrich their practice while anyone with an interest in the human psyche will be fascinated by the author s insights
