American Literature and Science Robert Scholnick, 2021-10-21 Literature and science are two disciplines often thought to be unrelated if not actually antagonistic But Robert J Scholnick points out that these areas of learning up through the beginning of the nineteenth century were understood as parts of a unitary endeavor By mid century they had diverged but literature and science have continued to interact conflict and illuminate each other In this innovative work twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science's conflicting meanings as a central dimension of the nation's conception of itself Reaching back to the Puritan poet minister physician Edward Taylor who wrote at the beginning of the scientific revolution and forward to Thomas Pynchon novelist of the cybernetic age this collection of original essays contains essential work on major writers including Franklin Jefferson Poe Emerson Thoreau Twain Hart Crane Dos Passos and Charles Olson Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus even while resisting their destructive applications this book points towards a reconciliation and integration within culture An innovative look at a neglected dimension of our literary tradition American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry

*Education, Arts, and Morality* Doris B. Wallace, 2006-01-27 Inspired by Howard Gruber's Evolving Systems Approach these studies explore creativity in several domains The idea that the creative person embodies a system of loosely coupled sub systems knowledge purpose and affect that work together is viewed here in different chapters that explore this concept These include autobiographies of incarcerated youth curricula for moral and civic responsibility changing attitudes of readers to text romance novels as well as case studies of highly creative individuals such as George Bernard Shaw Gruber's approach provides concepts as well as methodological tools which the authors apply to diverse creative processes This book is a valuable resource for undergraduate as well as graduate level students interested in creativity development and education In addition to the intrinsic interest of each chapter the guiding theme of the book is the underlying theory of creativity Gruber's Evolving Systems Approach and illustrates the unusual breadth and flexibility of that theory **Digging-Deep** John G. Sabol Jr., 2009-09-25 Digging Deep is an excavation of the archaeological site called John Sabol It is an unearthing of the author's

memory of experiences of past presences that cuts across space time and culture Water mining operations dust and dirt dogs and wolves and ghosts are seen as important features that are recovered from these memory excavations Some of the recalled practices that are unearthed include an alternative remembrance of trick or treat the multiple symmetrical worlds of history myth and ghosts in Winchester England the haunting nature of archaeological excavations and field surveys the actor's encounters with more than a filmed death scene and a search for a legendary monster in Arkansas All of these memories are perceived as symmetrically interrelated though they originate in different places They are viewed as a form of theatrical ghosting a resonating element that unfolds time as events and activities are framed by their contemporary significance in the author's life In this process of excavation a recurring haunting drama manifests in the life of this archaeologist who also happens to be a cultural anthropologist actor and ghost excavator
