Science and Catholicism in Argentina (1750-1960) Miguel de Asúa,2022-05-09 Science and Catholicism in Argentina 1750 1960 is the first comprehensive study on the relationship between science and religion in a Spanish speaking country with a Catholic majority and a Latin pattern of secularisation The text takes the reader from Jesuit missionary science in colonial times through the conflict ridden 19th century to the Catholic revival of the 1930s in Argentina The diverse interactions between science and religion revealed in this analysis can be organised in terms of their dynamic of secularisation The indissoluble identification of science and the secular which operated at rhetorical and institutional levels among the liberal elite and the socialists in the 19th century lost part of its force with the emergence of Catholic scientists in the course of the 20th century In agreement with current views that deny science the role as the driving force of secularisation this historical study concludes that it was the process of secularisation that shaped the interplay between religion and science not the other way around

Profesor Carlos Evaristo en bares clubes milongas y los más diversos espacios tangeros. Cuales son los cinco tangos que más le gustan fue la pregunta que sirvió para hacer funcionar la memoria emocional de los poetas autores absolutos de este libro. Las letras fueron ordenadas alfabéticamente. En cada uno de los tangos se puede leer la historia de su creación y una recomendación sobre las mejores versiones grabadas. Con estos versos inmortales se puede armar la comedia humana de Buenos Aires y en cada uno de ellos encontrar respuestas a los interrogantes existenciales del Río o de la Plata. A disfrutarlos entonces cantando si la melodía asoma recitando si la emoción lo manda sabiendo que como diría Discépolo el tango es el corazón que piensa.
