But the twentieth century was filled with ephemera items that were designed to disappear forever and these objects played crucial roles in some of that century's greatest works of literature. In *The Death of Things* author Sarah Wasserman delivers the first comprehensive study addressing the role ephemera played in twentieth century fiction and its relevance to contemporary digital culture. Representing the experience of perpetual change and loss, ephemera was central to great works by major novelists like Don DeLillo, Ralph Ellison, and Marilynne Robinson. Following the lives and deaths of objects, Wasserman imagines new uses of urban space, new forms of visibility for marginalized groups, and new conceptions of the marginal itself. She also inquires into present-day conundrums: our fascination with the durable, our concerns with the digital, and our curiosity about what new fictional narratives have to say about deletion and preservation. *The Death of Things* offers readers fascinating original angles on how objects shape our world. Creating an alternate literary history of the twentieth century, Wasserman delivers an insightful and idiosyncratic journey through objects that were once vital but are now forgotten.

*Shakespeare's Patterns of Self-knowledge* Rolf Soellner, 1972. The Renaissance evinced a strong interest in self-knowledge, and the theme is a persistent one in the moral and dramatic literature of the age. The ancient slogan *nosce teipsum* became a universal watchword of men schooled in the paramount importance of coming to know themselves. Shakespeare's abiding interest in the concept of self-knowledge shows itself in the dramatic patterns of his plays in images, ideas, themes, and character portrayals. The recurrence of such motifs as the search for the self and the dangers and rewards of finding oneself, as well as the prominence of such ideal or nearly ideal characters as Henry V, Duke Vincentio, and Prospero, testify to the powerful influence humanistic notions of self-knowledge exerted on Shakespeare as a writer and thinker. But his was a changing and developing art in a restless and dynamic age. Professor Soellner suggests that as much as Shakespeare's artistic development, which also affects his patterns of self-knowledge, is part of his natural growth into a mature and incomparable dramatist, it is yet analogous to the stylistic and philosophic changes that led from the Renaissance through Mannerism toward the Baroque. Mr. Soellner examines twelve plays in which self-knowledge, as the Renaissance understood it, figures prominently. Mindful that concepts of self-knowledge are not independent of cultural contexts and that the definitions in the moral literature of the time were notoriously imprecise and unscientific, he recognizes that the meaning of the term in Shakespeare's time must be acquired as Shakespeare acquired it: that is, contextually. Mr. Soellner distinguishes three points in Shakespeare's evolution: an early stage that culminates in the later histories and the romantic comedies, in which the dramatist reflected, sometimes almost schematically, the humanistic patterns of his time; a middle or interim phase that begins with *Julius Caesar* and includes both *Hamlet* and the problem comedies, in which Shakespeare experiences certain hesitations and entertains some doubts about the patterns accepted uncritically earlier; and the final period of the great tragedies and tragicomic romances, in which a growing awareness of the unpredictability of human nature leads to a dynamic synthesis in which what is the quintessence of humanism is fused with a full realization of the weakness of codification and a

profound sympathy for the human condition In the last of his great plays the tempests Mr Soellner find Shakespeare composed a brilliant finale in which are worked many of the patterns that he used in his earlier work The dream of The Tempest that man can control himself limit his power and even resign it voluntarily is totally humanistic and may be utopia But it is one of the happiest expectations of man and represents an irresistible affirmation of his potential greatness Rolf Soellner
