**Troubled Paradise** Eric Reitan, 2024-12-12 Grief over the loss of those we love is one of the most painful parts of life But Christianity has long offered consolation to those who grieve in the form of the Easter promise Death is not the end Beyond it lies a realm of perfect joy where mourning is no more and

every tear is wiped away But won't this promise have limits if as Christians have traditionally believed some of God's creatures are eternally lost Can I really be perfectly happy in heaven if say my children are damned or annihilated And what about the Christian teaching that those in heaven are morally sanctified Doesn't this mean they will be perfected in a love so wide it includes even our enemies and hence the lost While delving deeply into the nature of grief and its relation to Christian ethics this book explores the reasoning that generates this problem of heavenly grief examines purported solutions and invites deeper reflection on a frequently dismissed idea that avoids the problem altogether the universalist notion that there are no limits to Easter's promise because all are ultimately saved

Chord-extensions and Fences in Combination with Leading-edge Flaps on the Aerodynamic Characteristics at Mach Numbers from 0.40 to 0.93 of a 45 Degree Sweptback Wing of Aspect Ratio 4 Kenneth P. Spreemann, 1957 This investigation was made to determine the effects of 6 degree full span and 3 degree partial span leading edge flaps in combination with chord extensions or fences on the aerodynamic characteristics of a wing fuselage configuration with a 45 degree sweptback wing of aspect ratio 4 taper ratio 0.3 and NACA 65A006 airfoil sections The investigation was made in the Langley high speed 7 by 10 foot tunnel over a Mach number range of 0.40 to 0.93 and an angle of attack range of about 2 degrees to 24 degrees Lift drag and pitching moment data were obtained for all configurations From overall considerations of stability and performance it appears that with the model of this investigation the 6 degree full span leading edge flaps in combination with the chord extension over the outboard 35 percent of the span with or without leading edge camber would be the most desirable configuration *Technical Note* United States.
