Lost In Cyberspace Canada And The Information Revolution:

Lost in Cyberspace? Robert Chodos, Rae Murphy, Eric Hamovitch, 1997-01-01 The arrival of the information highway has been hyped as the greatest change in how humans live and work since we captured fire What are its implications for Canadian society The authors present a thought provoking examination of the new digital technologies considering particularly the effects they might be expected to have on employment sovereignty community and culture in Canada They trace the information highway back to its military origin guide readers through the maze of corporate players promoting its development and stop to explore the wide open culture of the internet Lost in Cyberspace is a pioneering look at the influence of new digital technologies on Canadian society **Canadian Communication Thought** Robert E.

Babe, 2000-01-01 Babe examines the writings of ten major thinkers in the context of their physical and cultural environments and finds that there is indeed a mode of theorizing that is quintessentially Canadian **Tug of War** Jocelyn

Wills, 2017-09-04 Selling Earth observation satellites on their abilities to predict and limit adverse environmental change politicians business leaders the media and technology enthusiasts have spent sixty years arguing that space exploration can create a more peaceful prosperous world Capitalist states have also socialized the risk and privatized the profits of the commercial space industry by convincing taxpayers to fund surveillance technologies as necessary components of sovereignty freedom and democracy Jocelyn Wills's Tug of War reminds us that colonizing the cosmos has not only accelerated the arms race but also encouraged government contractors to compete for the military and commercial spoils of surveillance Although Canadians prefer to celebrate their role as purveyors of peaceful space applications Canada has played a pivotal part in the expansion of neoliberal policies and surveillance networks that now encircle the globe primarily as a political ally of the United States and component supplier for its military industrial complex Tracing the forty five year history of Canada's largest space company MacDonald Dettwiler and Associates MDA through the lens of surveillance studies and a trove of oral history transcripts government documents trade journals and other sources Wills places capitalism's imperial ambitions squarely at the centre of Canada US relations and the privatization of the Canadian political economy Tug of War confronts the mythic lure of technological progress and the ways in which those who profess little interest in war rationalize their leap into military contracting by avoiding the moral and political implications of their work Cracking the Gender

Code Melanie Stewart Millar, 1998 The digital world its advertising machinery and the popular media are pushing women back into traditional roles and once again creating a superior hypermacho expert male Women must look critically at who is in charge of the new technology and challenge the gender codes that can work against them In this path breaking book Melanie Stewart Millar explores power relations in the digital world and asks us to question what is really going on How is technology shaping our future What is the role of women within digital culture What is the corporate agenda How is it influencing women's work Provocative and incisive Cracking the Gender Code questions how the gains women have made

through feminism over the last decades are being eroded It looks specifically at how the articles and images of Wired the magazine of the digital generation are detrimental to women a discourse that may be establishing the underlying ideology of a far reaching communications industry Stewart Millar argues that simply being computer literate or knowing how to use the Net is not good enough Women need to demystify the technology and crack the gender code to participate equally in the cyber world of the future **The Canadian Forum** ,1997 Includes critical reviews LLT ,1997 **Canadian Periodical Index** ,2000 *Gender and the Information Revolution in Africa* International Development Research Centre (Canada),2000 *Gender and the Information Revolution in Africa* Studies in Political Economy ,2002 *A tributação do comércio eletrônico* Flávia de Vasconcellos Lanari,2005 Médias et démocratie Anne-Marie Gingras,2009 Dans cet ouvrage Anne Marie Gingras analyse le rôle politique des médias privés et publics des sondages et des technologies médiatiques Elle décrit comment il est qu'il s'agit de maillons de la démocratie les présentant plutôt en partie comme des outils permettant la reproduction du pouvoir L'auteure identifie les liens de dépendance entre les médias et les pouvoirs politiques Elle décrit la politique spectacle et explique le code de communication des hommes et des femmes politiques Elle expose aussi une série de malaises liés à l'insertion des médias dans le système économique incidences de la propriété sur les contenus conséquences de la concentration de la presse et enfin marchandisation qui se traduit bien souvent par le mélange des genres entre information et divertissement Elle présente aussi une réflexion critique sur les sondages ces instruments qui passent pour être des consultations populaires entre les lections Les sondages recueillent ainsi la légitimité associée à la volonté du lectorat ce qu'on appelle opinion publique Enfin Anne Marie Gingras fait le point sur les technologies médiatiques qui ont connu une évolution fulgurante depuis quelques années Après avoir exposé les faits marquants de la naissance et de l'évolution d'Internet l'auteure explique les types de régulation en place pour les technologies médiatiques accès aux services protection de la vie privée liberté d'expression droits d'auteur etc Les effets des technologies médiatiques sur les comportements politiques sont aussi étudiés tout comme le militantisme sur Internet et les blogues politiques *Books in Print* ,1991 IP ,1999 *Bulletin of the Atomic Scientists* ,1966-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world Digital Humanities and the Cyberspace Decade, 1990-2001 Claire Warwick,2024-10-03 Setting out a history of cyberspace and its relationship with the discipline that was to become digital humanities this book is an account of an often forgotten period of internet history in the 1990s when this medium was in its infancy It provides a detailed account of the concepts of cyberspace and the virtual which were characteristic of a perception that using the internet allowed users to enter a separate space from everyday life a world elsewhere In doing so it argues that this libertarian idea of the internet framed it as a new frontier where the rules of the everyday world did not and should not apply and where the individual could find freedom These early norms and the regrettable lack of regulation that was a

consequence of them this book argues contributed to many of current issues with internet media including of toxic communication disinformation and over commercialisation Securing Privacy in the Internet Age Anupam Chander, Lauren Gelman, Margaret Jane Radin, 2008-10-01 The Internet Age has created vast and ubiquitous databases of personal information in universities corporations government agencies and doctors offices Every week stories of databases being compromised appear in the news Yet despite the fact that lost laptops and insecure computer servers jeopardize our privacy privacy and security are typically considered in isolation Advocates of privacy have sought to protect individuals from snooping corporations while advocates of security have sought to protect corporations from snooping individuals *Securing Privacy in the Internet Age* aims to merge the discussion of these two goals The book brings together many of the world s leading academics litigators and public policy advocates to work towards enhancing privacy and security While the traditional adversary of privacy advocates has been the government in what they see as the role of the Orwellian Big Brother the principal focus of this book is the fraternity of Little Brothers the corporations and individuals who seek to profit from gathering personal information about others *Naked in Cyberspace* Carole A.
