Evolutionary Love Relationships Andrew Harvey,Chris Saade,2017-01-17 In this profoundly uplifting book authors and sacred activists Andrew Harvey and Chris Saade call us to the next paradigm in human relations love connections that are solidly grounded in individual authenticity and passionately focused on service and solidarity Rather than limiting their gaze to each other partners are invited to take their focus outward channeling their energies toward those causes that both unite them and transform the world we live in With love as the fuel for inspired action the relationship becomes a homage to sacred purpose finding its deeper meaning in its efforts to positively influence the planet There are many books that invite us to focus on love relationship its perils and delights its shadow and light as the place where meaningful change happens and there are others including some potent ones written by these two authors individually that invite us to unite our individual spiritual paths sacred purpose callings and the like with benevolent action but this is the first book that focuses on the next step the bringing together of sacred activism and love relationship Evolutionary Love Relationships contains a powerful vision that offers humanity a path to coupledness not as a privatized escape or preoccupation but a path to evolve into dedicated activists whose combined purpose is to utilize their resources to help and sustain the planet and which does not forsake but includes the pleasure of personal fulfilment between the bonded pair They can enjoy the fullness of divine human love in the depths of their own personal relationship supporting each other s authenticity but also enjoy it in the ways that those healing depths make them powerful and strong and lucid and vibrant enough to go out into the world and pour their gifts out for the transformation of the planet What is really at stake is this If we continue to have a vision of relationship as purely personal purely private and something that we cultivate only for our own pleasure we will keep feeding the tragic narcissism that is now ravaging the planet on every level The real thrust and purpose and divine importance of relationship is to give us the fuel to take on the world to give us the passion to embrace the causes of justice to give us the energy to keep on pouring ourselves out for the transformation of the planet With a foreword by An Uncommon Bond author Jeff Brown this inspiring book shows us the way to turn our love relationship into a prayer for world transformation And not just a passive prayer but a prayer in action impassioning the world with a bonfire of sacred and benevolent activism that cannot be stopped This prayer may well save us

Evolution, Feminism, and Romantic Fiction Ania Grant,2025-08-14 Romantic fiction has long been dismissed as trivial and denounced for peddling supposedly oppressive patriarchal myths of heterosexual love and marriage Despite such criticism the popularity of romantic fiction has only increased in recent decades Drawing on research from the evolutionary sciences Ania Grant proposes that narrative patterns of romantic stories and their enduring appeal reflect the importance of love as a fundamental human drive She examines two of the most successful and critically scrutinized romantic narratives of the past 200 years Jane Austen s classic novel *Pride and Prejudice* and the hit television

series *Sex and the City* and argues that such texts simulate the cognitive and emotional complexities of mate choice one of the most consequential decisions from both a biological and a cultural perspective Her biocultural analysis aligns the interpretation of romantic fiction with the feminist ideals of female autonomy and gender equality It also suggests that positive identification with romantic heroines gives audiences the hope and energy to pursue the transformation of gender relations in real life The book will be of interest to anyone who ever wondered why so many women and some men around the world are enthralled by romantic stories It will also appeal to anyone who has ever been inspired by romantic happy endings to strive for a world in which men and women love and cooperate with each other even if it seems like a utopian ideal while the war of the sexes rages on

The Evolution of Love Emil Lucka,1922 **Lovers' Crossroads** Pasquale De Marco,2025-07-27

Evolution of Love Emil Lucka,Ellie Schleussner,2024-11-24

The object of this book which is addressed to all cultured men and women is to set forth the primitive manifestations of love and to throw light on those strange emotional climaxes which I have called Metaphysical Eroticism I have taken no account of historical detail except where it served the purpose of proving explaining and

illustrating my subject Nor have I hesitated to intermingle psychological motives and motives arising from the growth and spread of civilisation The inevitable result of a one sided glimpse at historical facts would have been a history of love an undertaking for which I lack both ability and inclination On the other hand had I written a merely psychological treatise disregarding the succession of periods I should have laid myself open to the just reproach of giving rein to my imagination instead of dealing with reality I have availed myself of historical facts to demonstrate that what psychology has shown to be the necessary phases of the evolution of love have actually existed in historical time and characterised a whole period of civilisation The history of civilisation is an end in itself only in the chapter entitled The Birth of Europe My work is intended to be first and foremost a monograph on the emotional life of the human race I am prepared to meet rather with rejection than with approval Neither the historian nor the psychologist will be pleased Moreover I am well aware that my standpoint is hopelessly old fashioned To day nearly all the world is content to look upon the sexual impulse as the source of all erotic emotion and to regard love as nothing more nor less than its most exquisite radiation My book on the contrary endeavours to establish its complete independence of sexuality My contention that so powerful an emotion as love should have come into existence in historical not very remote times will seem very strange for all outward profession of faith in evolution notwithstanding men are still inclined to take the unchangeableness of human nature for granted The facts on which I have based my arguments are well known but my deductions are new it is not for me to decide whether they are right or wrong In the first introductory part I have made use of works already in existence in addition to Plato and the poets but the second and third parts are founded almost entirely on original research E L **Evolutionary Lover** Alexander Emma

Heartwood,2023-11-06 In **Evolutionary Lover** embark on a captivating journey through time and human emotion exploring the intricate and fascinating tapestry of love across generations This thought provoking book delves into the evolution of love weaving together history science psychology and personal anecdotes to provide a unique perspective on one of humanity s most profound and enigmatic experiences Drawing on the latest research and insights into evolutionary biology sociology and neuroscience **Evolutionary Lover** unveils the ancient roots of love and how it has adapted and transformed over the centuries From the primal instincts that ignited sparks of attraction in our ancestors to the complex web of emotions that bind modern relationships this book offers an insightful and comprehensive analysis of love s evolution **Evolution and "the Sex**

Problem" Bert Bender,2004 A noteworthy investigation of the Darwinian element in American fiction from the realist through the Freudian eras theories of sexual selection and of the emotions are essential elements in American fiction from the late 1800s through the 1950s particularly during the Freudian era and the years surrounding the Scopes trial the Sex Problem and what resulted was a great diversity of American narratives aligned with either Darwinian or a number of anti Darwinian theories of evolution Included are intriguing discussions of works by Frank Norris Jack London Stephen Crane Theodore Dreiser Gertrude Stein Willa Cather Sherwood Anderson F Scott Fitzgerald five writers of the Harlem Renaissance

John Steinbeck and Ernest Hemingway Among the ideas explored are Darwin's theory of common descent the question of man's place in nature the possibility of evolutionary progress the issues of heredity and eugenics the Darwinian basis of Freud's theory of sexual repression the quandary of male violence and the role of female choice in sexual selection the power of and the problems of racial and sexual selection the power of and the problems of racial and sexual difference and the ecological problems that arose directly from Darwin's theory of evolution America's major narratives of human life and love and will be appreciated by literary scholars and readers interested in Darwinism and culture The Politics of Love Carla Christina Hustak, 2024-01-23 The Politics of Love explores the entanglement of emotions social movements and science in reconfiguring human and nonhuman relations As Darwin's evolutionary theory informed the development of sexual science and the sex reform movement between the 1890s and the 1920s sex reformers emerged as a group of diverse and culturally influential professionals doctors psychologists artists political activists novelists and academics who shared a profound commitment to changing the world by changing the practice of sex Sex reformers reinvented love as a scientific practice of sex that brought humans and nonhumans into the fold of early twentieth century racial gender and sexual politics Carla Christina Hustak illuminates how sex reformers insistence that love can shift human and nonhuman relations is more than just a historical narrative it is a moment in time interconnected with urgent contemporary concerns over the global implications of our emotional relationships to other humans animals the earth and atmospheric and technological forces

Nature and Lovers Dominique Webb MA, 2020-06-03 Literary flare passions from the roots of rejuvenation with regeneration as side which rather than being supernaturally constituted shows semantic drift towards a somatic of colloquial derivations For that brush of jacket collars in the side street you thigh on waste whilst twisting to the pub for the old bars of money that cool your hips for auditory sprinkles songs drumming the tune of your cognitive motor to transmute chemistry up from your cells In the dialects and runs from payment rows at the end of a hard days work where new derision philologies created connective benignity disputes perhaps with other cities and ruralities to blanket universal pay by reward proportional Entries For the thrush the jaguar threading grass stems the master sparrow thatcher the strong organisational lion of the jungle animals the horse of the war Seeing waves sweep over the land in national assertions that economic change has determined Once just a shout but now the game is being sold Although evolution steps up sometimes when our brows merely need to be caressed by another it's scientific enzymes define every part of our lives Genetic inheritance glints the tinder and shakes the hinds and it is the case that where strongly or quietly and secretly is allowed we all believe that evolutionary biology renders our wit or most of us do I believe in the sensual **Evolutionary Love and the Ravages of Greed** Adam Crabtree, 2017-09-20 The widespread turmoil in the human community today is a symptom of the dominance of unchecked desire or Greed This book distinguishes two ancient concepts of love the Greek ideas of agape and eros and explores how agape the driver of evolution when put into play through the harmonious action of eros displays the true

essence of love Evolutionary Love that alone is the antidote to the ravages of Greed **Evolutionary Theory and Human Nature** Ron Vannelli, 2012-12-06 Evolutionary Theory and Human Nature is an original highly theoretical work dealing with the transition from genes to behavior using general principles of evolution especially those of sexual selection It seeks to develop a seamless transition from genes to human motivations as bio electric brain processes emotional cognitive processes to human nature propensities various constellations of emotional cognitive forces desires and fears to species typical patterns of behavior This work covers two often antagonistic fields biology and the social sciences It should be of strong interest to anthropologists sociologists sociobiologists psychobiologists and psychologists who are interested in the question of human nature influences on social behavior Evolutionary Rhetoric Wendy Hayden, 2013-02-14 In Evolutionary Rhetoric scholar Wendy Hayden provides a comprehensive examination of the relationship between scientific and feminist rhetorics in free love feminism studying the movement from its inception in the 1850s to its dark turn toward eugenics in the early 1900s Hayden organizes her provocative study by scientific discipline evolution physiology bacteriology embryology and heredity Each chapter explores how free love feminists adopted the evidence of that discipline in their arguments for increased sex education women s sexual rights reproductive freedom and the abolition of a marriage system that repressed the rights and the sexuality of women Hayden takes our conventional understanding of the relationship between nineteenth century feminism and science and expands it The author provides examples of the powerful words of free love feminists to show exactly how these exceptional women used science as a rhetorical platform to promote feminist and often radical social reforms Considering why the free love movement has not yet been studied Hayden also discusses how the recovery of this movement may impact larger goals in the recovery of women s rhetoric This important and timely study of a long forgotten movement adds to our understanding of the complexities of the history of feminism Love Anthony Walsh, 2017-07-05 Love is a little word with a universe of meanings and has engaged people s interest throughout human history The need to give and receive love lies deep within human nature Philosophers poets theologians sociologists and scientists have all attempted to explain its exact origin but is it an evolutionary adaptation or a social construct Walsh discusses that the nature of and need for love has biological origins He draws upon Darwin s sexual selection theory to define the perceptions of love by infants through the process of experience dependent brain wiring He observes that mother love makes a child capable of loving and that father love makes a child feel worthy of love He appraises the origin and purpose of romantic love in his discussions on sexual reproduction by looking at chemical and neurological responses to love and the influence of love on one s physical and mental health With frequent quotes from literary masters like Shakespeare to orient one s scientific and humanistic understanding of love Walsh goes on to explore various styles of romantic love including monogamy promiscuity bartering love and betrayed love the effects of a skewed sex ratio on dating and mating practices and the age old quest for a perfect society populated by perfect people obeying the biblical command to love one another Romantic Passion William

Jankowiak, William R. Jankowiak, 1997-02-13 *Observers from the West* the book contends have incorrectly projected rigid ethnocentric notions of love and marriage onto cultures around the world Contributors look beyond each society's official institutions to explore expressions of love offering new perspectives on arranged marriages and polygamy and reexamining as well the other side of the equation rejection and grief
