**Animals as the Third in Relational Psychotherapy** Jo Silbert, Jo Frasca, 2021-03-03 Animals as the Third in Relational Psychotherapy Exploring Theory Frame and Practice elegantly and skilfully weaves together relevant literature clinical reflections compelling case material and contemporary psychoanalytic theory to demonstrate how the presence of an animal in the treatment arena can eventually bring about relational interpersonal and intrapsychic change Contemporary relational psychoanalytic literature has been virtually silent about our relationship with animals a feature seemingly intrinsic to our relational worlds This book seeks to remediate this void by giving voice to the practice and principles of working relationally in the presence of an animal The text accentuates recurrent themes animals are seen by human beings as significant subjective others and are treated as legitimate partners for relational and interpersonal processes attachment figures and transferential objects animals in the psychotherapy environment can play the role as a bridge from the unconscious to the conscious from the dissociated to the experienced from the intrapsychic to the interpersonal as the third in the treatment arena the animal helps to reveal the field bringing conflicts to life and making them available for analysis in the clinical setting In seeking to authorise the incorporation of animals into the practice of relational psychotherapy the text applies conventional concepts to novel contexts it extends psychoanalytic and relational principles to create a theoretical framework within which to consider the therapeutic effects of working in the triadic interactions of therapist client and animal and thus also begins to evolve a new version of relational psychoanalytic practice The authors value the human animal experience in treatment and repeatedly show how the application of a relational psychoanalytic lens to the patient therapist animal triad can enhance the therapeutic process in ways that encourage progressive communication understanding of the patient and the relaxing of defences leading to the symbolising of relational capacity therapeutic breakthrough and intrapsychic change

**Interrelations Between People and Pets** Bruce Fogle, 1981 **People-pleasing Animals** Jennifer Link, 2021 Pets are more ubiquitous now than ever with more and more couples opting to adopt dogs instead of having children there's never been a better time to attempt to discern the ways that people view these animals and what makes some people more likely to adopt one animal over another Though past research has aimed to examine the ways that dog and cat people differ in terms of personality little research has attempted to assess the role of attachment in the preference that individuals have towards one animal or another The present research aimed to assess the ways that attribution of theory of mind and attachment style impact the preference that individuals have for cats or dogs Findings suggest that on average participants attributed more theory of mind to dogs than to cats overall Study 2 also indicates that pet preference as well as attachment style appear to partly influence the amount of

theory of mind an individual attributes to dogs in particular The results of this research may begin to unravel the ways that individuals attribute different traits to their pets based on species and hopefully will contribute to the broader literature on the way that personality and individual differences factor into the preferences that individuals have for different animals as pets Page 3      Animal Theory Derek Ryan,2015-06-14 From caged orangutans to roasted pig from dog training to horse phobias from communicating bees to ruminating cows over the course of an introduction and four thematically organised chapters Derek Ryan explores how animals are encountered in theoretica      *Pets and People* Barrie Gunter,1999-06-02 In an examination of the relationship between pets and people Barrie Gunter illustrates the many psychological benefits that animal companionship can bestow upon us providing security for the anxious companionship for the lonely and status symbols for the image conscious This book examines the phenomenon of pet ownership and the importance placed upon this strange relationship by people in modern society      **Animals ... in Theory** ,2012
