Lucifers Hammer 1:

Lucifer's Hammer Larry Niven, Jerry Pournelle, 1985-05-12 The first satisfying end of the world novel in years an ultimate one massively entertaining Cleveland Plain Dealer The gigantic comet had slammed into Earth forging earthquakes a thousand times too powerful to measure on the Richter scale tidal waves thousands of feet high Cities were turned into oceans oceans turned into steam It was the beginning of a new Ice Age and the end of civilization But for the terrified men and women chance had saved it was also the dawn of a new struggle for survival a struggle more dangerous and challenging than any they had ever known Take your earthquakes waterlogged condominiums swarms of bugs colliding airplanes and flaming what nots wrap them up and they wouldn't match one page of Lucifer's Hammer for sweaty palmed suspense Chicago Daily News

Lucifer's Hammer Jerry Pournelle, 1981-04 Captain Rick Galloway and his men had been talked into volunteering for a dangerous mission only to be ruthlessly abandoned when faceless CIA higher ups pulled the plug on the operation They were cut off in hostile territory with local troops and their Cuban advisors rapidly closing in And then the alien spaceship landed Copyright Libri GmbH All rights reserved

Cosmic Impact Andrew May, 2019-02-07 As end of the world scenarios go an apocalyptic collision with an asteroid or comet is the new kid on the block gaining respectability only in the last decade of the 20th century with the realisation that the dinosaurs had been wiped out by just such an impact Now the science community is making up for lost time with worldwide efforts to track the thousands of potentially hazardous near Earth objects and plans for high tech hardware that could deflect an incoming object from a collision course a procedure depicted with little regard for scientific accuracy in several Hollywood movies Astrophysicist and science writer Andrew May disentangles fact from fiction in this fast moving and entertaining account covering the nature and history of comets and asteroids the reason why some orbits are

more hazardous than others the devastating local and global effects that an impact event would produce and more optimistically the way future space missions could avert a catastrophe *Database Modeling Step by Step* Gavin Powell,2020-01-06 With the aim of simplifying relational database modeling *Database Modeling Step by Step* presents the standard approach to database normalization and then adds its own approach which is a more simplistic intuitive way to building relational database models Going from basics to contemporary topics the book opens with relational data modeling and ends with BigData database modeling following a road map of the evolution in relational modeling and including brief introductions to data warehousing and BigData modeling A break down of the elements of a model explains what makes up a relational data model This is followed by a comparison between standard normalization and a more simplistic intuitive approach to data modeling that a beginner can follow and understand A brief chapter explains how to use the database programming language SQL Structured Query Language which reads from and writes to a relational database SQL is fundamental to data modeling because it helps in understanding how the model is used In addition to the relational model the last three chapters cover important modern world topics including denormalization that leads into data warehouses and BigData database modeling The book explains how there is not much to logical data modeling in BigData databases because as they are often schema less which means that BigData databases do not have schemas embedded into the database itself they have no metadata and thus not much of a logical data model Online bonus chapters include a case study that covers relational data modeling and are available at the author s web site www.oracletroubleshooter.com/datamodeling.html

Beyond 2012: Catastrophe or Awakening? Geoff Stray,2009-05-21 An illustrated encyclopedic overview of the prophecies calendars and theories that indicate the year 2012 is a threshold of great change for humanity Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012 Sifts through the catastrophic theories to show what we might really expect in 2012 In December of 2012 the Mayan Calendar s Great Cycle will come to an end Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed What is certain however is that a rare galactic alignment will occur one so unique that it is found at the core of many wisdom traditions from around the globe Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982 Far from confining his research to the Maya who provide the most prominent predictions indicating this date will herald significant changes for humanity he has studied the prophetic traditions of other cultures including the Tibetan Chinese Jewish Ethiopian and tribal cultures from around the globe to show the kind of convergence of cosmic purposes happening along a number of parallel tracks This book offers an extensive study of many modern theories including Terence McKenna s timewave zero and Maurice Cotterell s sunspot research as well as anomalous phenomena such as near death experiences and crop circles Sifting through all the scientific research and speculation that the year 2012 has inspired Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date

Postapocalyptic Fiction and the Social Contract Claire P. Curtis,2010-07-17 Postapocalyptic Fiction and the Social Contract We ll Not Go Home Again provides a framework for our fascination with the apocalyptic events The popular appeal of the end of the world genre is clear in movies novels and television shows Even our political debates over global warming nuclear threats and pandemic disease reflect a concern about the possibility of such events This popular fascination is really a fascination with survival how can we come out alive And what would we do next The end of the world is not about species death but about beginning again This book uses postapocalyptic fiction as a terrain for thinking about the state of nature the hypothetical fiction that is the driving force behind the social contract The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian a Lockean or a Rousseauian lens including *Lucifer s Hammer* by Larry Niven and Jerry Pournelle *Alas Babylon* by Pat Frank *Malevil* by Robert Merle and *Into the Forest* by Jean Hegland The latter half of the book examines Octavia Butler s postapocalyptic Parable series in which a new kind of social contract emerges one built on the fact of human dependence and vulnerability
