Ethics, Law, and Aging Review, Volume 10 Marshall B. Kapp, 2004-12-06 Although the topic of decision making capacity and older persons has been discussed in the literature there still is much to be learned about it theoretically and practically Experts continue to disagree about which standards are important for assessing decision making capacity Questions such as When should a capacity assessment be done on an older person and by whom are covered by the editors Topics included in this volume are the application of an original framework for ethical decision making in long term care an elder s capacity to decide to remain living alone in the community the quest for helpful standardized instruments for evaluating decision making capacity and end of life liability issues

Abuse of Minors in Clinical Studies Klaus Rose, 2023-11-25 With the emergence of effective drugs and observed drug toxicities in babies two mantras emerged that children are therapeutic orphans and that children are not small adults US and EU laws demand pediatric studies as a condition for the approval of new drugs in adults This is called Pediatric Drug Development PDD Although apparently reasonable there are catches Children are vulnerable at birth but they grow and become bodily mature with puberty well before coming of age Minors are not another species The 18th birthday an administrative legal limit does not correspond to a physiological change Drugs treat the body not the legal status PDD results in pointless studies in bodily mature adolescents and in exaggerated studies in younger minors An originally well intentioned concept results in thousands of questionable studies worldwide This book draws attention to conflicts of interest and ethical dilemmas of PDD and questions its applicability for adolescents and minors that are no longer babies

The Elements of Inquiry Peter J. Burke, Sara Jimenez Soffa, 2018-03-23 The Elements of Inquiry covers the basic guidelines for graduate students doing an investigation or inquiry project It distills the rubrics necessary for teaching research methods and completing research projects and gives the student researcher a list of steps to follow to complete any type of inquiry project including formal research projects such as doctoral dissertations It was written to support the work of students in an educational leadership doctoral program but it will also assist the research efforts of college students at any level in any discipline The book begins by establishing the underlying philosophical concepts upon which all good research is based preparing students to get down to the nuts and bolts of conducting their own research and evaluating the research of others Fundamental concepts and rules of research are

explained both for producers and consumers of social science and educational research Numerous practical examples illustrate the steps in the research process presented in the text There are end of chapter exercises for students to apply the concepts discussed in the chapter Templates for organizing and presenting research provide students with a game plan for success with their research The book ends with an up to date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more specialized research topics While most research books detail one or more method in depth this text provides a broad introduction to many techniques and models used in doctoral dissertations and will be of particular value to those who are consumers of inquiry studies and research reports Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research

Ward-based Critical Care: a guide for health professionals Ann M Price,Dr Sally A Smith,Dr Alistair

Challiner,2016-01-01 Like the original Ward based Critical Care this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting It should be of value to a wide range of healthcare professionals including junior doctors nurses physiotherapists and students It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections The book is still structured around the ABCDE approach to assessing and managing patients as this is promoted in critical care and resuscitation care training The focus on practical examples and hot tips to aid memory of key points continues All the chapters have been updated with the most recent guidance as available at the time of writing This has meant that some chapters have required major revisions while others have remained relatively unchanged Some new chapters have been included such as the ones on anaphylactic shock patient safety dealing with pregnant women in the ward setting and massive blood transfusion In addition each section now starts with a chapter giving an overview of the A E approach in order to provide more detail about assessing and managing those aspects of patient care This informative book contains many useful features such as clinical scenarios hot tips and practical skills and the text is richly illustrated and cross referenced throughout **Elements of Inquiry** Peter J
