Manual For Using The Mmpi 2 As A Therapeutic Intervention:

The Oxford Handbook of Treatment Processes and Outcomes in Psychology Sara Maltzman, 2016-06-15 The Oxford Handbook of Treatment Processes and Outcomes in Psychology presents a multidisciplinary approach to a biopsychosocial translational model of psychological treatment across the lifespan. It describes cutting edge research across developmental clinical counseling and school psychology, social work, neuroscience, and psychopharmacology. The Handbook emphasizes the development of individual differences in resilience and mental health concerns, including social, environmental, and epigenetic influences across the lifespan, particularly during childhood. Authors offer detailed discussions that expand on areas of research and practice that already have a substantive research base, such as self-regulation, resilience, defining evidence-based treatment, and describing client-related variables that influence treatment processes. Chapters in newer areas of research are also included, e.g., neuroimaging, medications as adjuncts to psychological treatment, and the placebo effect. Additionally, authors address treatment outcomes, such as evaluating therapist effectiveness, assessing outcomes from different perspectives, and determining the length of treatment necessary to attain clinical improvement. The Handbook provides an entrance to the research, as well as hands-on guidance and suggestions for practice and oversight, making it a valuable resource for graduate students, practitioners, researchers, and agencies alike.

Therapeutic Assessment with Adults Francesca Fantini, Filippo Aschieri, Raja M. David, Hale Martin, Stephen E. Finn, 2022-06-23 This book is a comprehensive guide to Therapeutic Assessment (TA) with adults, showing how to collaboratively engage clients in psychological testing to help them achieve major and long-lasting change. This guide clearly lays out each step of TA with adults, including its rationale and detailed instructions on how to handle a range of clinical situations. Additionally, in part one, the authors fully describe the development of TA, its theoretical bases, and the most up-to-date research on the model. In the second part of the book, the authors describe the structure and techniques of TA and illustrate each step with transcripts from a clinical case. Further clinical illustrations help the reader understand how to conduct a TA with different types of clients, including those from culturally diverse backgrounds. This book is essential for all clinicians, therapists, and trainees working with adult clients, along with students in assessment courses.

Therapeutic Feedback with the MMPI-2 Richard W. Levak, Liza Siegel, David S. Nichols, 2012-03-29 Therapeutic Feedback with the MMPI-2 provides the clinician with empirically based practical information about how to convey the abundance of information in the MMPI-2 profile in a way that is collaborative, empathic, hopeful, and facilitates a therapeutic alliance. The larger trim size also reflects the size of the MMPI-2 interpretive reports and makes it easy for clinicians to copy pages of the book to share with their clients.
