

Texas Home Vegetable Gardening Guide

Joseph Masabni*

Home gardening continues to grow in popularity. One of every three families does some type of home gardening, according to conservative estimates, with most gardens located in urban areas. Texas gardeners can produce tasty, nutritious vegetables year-round. To be a successful gardener you will need to follow a few basic rules and make practical decisions.

Garden Site

Although many urban gardeners have little choice, selecting a garden site is extremely important. The ideal garden area gets full or nearly full sunlight and has deep, well-drained, fertile soil. The garden should be near a water outlet but not close to competing shrubs or trees. However, if you modify certain cultural practices and select the right crops, almost any site can become a highly productive garden.

Crop Selection

One of the first things you must do is decide what vegetables to grow. Table 1 lists crops suitable for small and large gardens. You will want to grow vegetables that return a good portion of nutritious food for the time and space they require. Vine crops such as watermelons, cantaloupes, winter squash and cucumbers need large amounts of space, but if you plant them near a fence or trellis you may need less space for vine crops. Plant the vegetables your family will enjoy most. Resist the urge to plant more of any particular vegetable than you need unless you plan to preserve the surplus.

Excerpt from *Vegetable Gardening: A Manual on the Growing of Vegetables for Home Use and Marketing*. This book was prepared primarily for the School of Agriculture of the University of Minnesota, where it has been used as a textbook since it was first published. It is the result of the development of the system of teaching at this school and is intended for students of the high school grade. In this, the ninth edition, a few changes have been made to bring it up to date in the matter of methods of culture and varieties recommended. In previous editions, I have taken pleasure, as I do now, in acknowledging the assistance which I have received in many ways in preparing the manuscript for the first edition of this book from Prof. Harry Snyder, the late Dr. Otto Luggner, the late Major A. G. Wilcox, and my former assistant Prof. R. S. Mackintosh, now Professor of Horticulture at Auburn, Alabama. In preparing this edition, I have helped by Mr. A. R. Kohler, Assistant in Horticulture. Figures numbered 52, 67, 69, and 121 are from D. Landreth; 26, 27, 31, 32, and 92 are from W. Atlee Burpee; Nos. 22, 23, 81, and 96 are reproduced from publications of the Department of Agriculture; No. 5 is from Bateman Manufacturing Co.; Nos. 34, 35, 36, 37, 38, 39, 41, 42, and 43 were loaned by Dr. Luggner; Nos. 58, 61, 63, 65, 66, 106, 108, 112, 119, 120, and 122 from various sources.
