the visual culture of the early twenty first century military Focusing on the Marine Corps which played a critical part in the invasion and occupation of Iraq John Pettegrew argues that U S military force in the Iraq War was projected through an optics of combat Powerful military technology developed in the Iraq and Afghanistan wars has placed war in a new posthuman era Pettegrew s interviews with marines as well as his analysis of first person shooter videogames and combat footage lead to startling insights into the militarization of popular digital culture An essential study for readers interested in modern warfare policy makers and historians of technology war and visual and military culture
