Smith, 2024-02-06 An illustrated examination of laboratory architecture and the work that it does to engage the public recruit scientists and attract funding The laboratory building is as significant to the twenty first century as the cathedral was to the thirteenth and fourteenth centuries The contemporary science laboratory is built at the grand scales of cathedrals and constitutes as significant an architectural statement The laboratory is a serious investment in architectural expression in an attempt to persuade us of the value of the science that goes on inside In this lavishly illustrated book Sandra Kaji O Grady and Chris L Smith explore the architecture of modern life science laboratories and the work that it does to engage the public recruit scientists and attract funding Looking at the varied designs of eleven important laboratories in North America Europe and Australia all built between 2005 and 2019 Kaji O Grady and Smith examine the relationship between the design of contemporary laboratory buildings and the ideas and ideologies of science Observing that every laboratory architect and

client declares the same three aspirations to eliminate boundaries to communicate the benefits of its research programs and to foster collaboration Kaji O Grady and Smith organize their account according to the themes of boundaries expression and socialization For instance they point to the South Australian Health and Medical Institute s translucent envelope as the material equivalent of institutional accountability the insistent animal imagery of the NavarraBioMed laboratory in Spain and the Hillside Research Campus s mimicry of the picturesque fishing village that once occupied its site Through these and their other examples Kaji O Grady and Smith show how the architecture of the laboratory shapes the science that takes place within it

Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl Avery Library, 1995 **Barcelona/Milán: Arquitecturas modernas en contacto** Gaspar Jaén i Urban, Marco Lucchini, 2023-06-19 Barcelona y Milán a pesar de ser dos ciudades muy diferentes respecto a la morfología y a la historia urbana además obviamente de la diferente situación social y política que vivieron sus habitantes entre 1945 y 1977 presentan en gran parte del novecientos características tipológicas convergentes que se pueden reconocer con facilidad especialmente por lo que se refiere a muchas piezas arquitectónicas de la modernidad construidas a partir de los primeros años cincuenta cuando los arquitectos más significativos de ambas ciudades entraron en un contacto amistoso y profesional intenso y continuado que se prolongó con la incorporación de actores diferentes hasta final del siglo XX Pero los edificios que proyectaron estos arquitectos muestran afinidades más complejas y profundas de las que se podrá pensar que se derivan de un simple cambio de ideas entre profesionales y tienen que ver con aspectos comunes del *genius loci* de ambas ciudades y con estrategias de difusión de los principios proyectuales La interrelación entre ambas ciudades era por una parte una forma de escapar del sofocante control de la dictadura franquista pero por otra era una forma de difundir la concepción de la modernidad de la Escuela de Milán alejada del mito de la tecnología y cercana a la valoración del contexto urbano y a una visión crítica de la historia Pero esta conexión no solo fue en un sentido ya que si Milán influyó en Barcelona también Barcelona influyó en Milán y no únicamente en términos urbanos y arquitectónicos sino también políticos económicos y sociales **Architecture Series: Bibliography**, 1988 *Barcelona* Suzanne Strum, 2001 This guide looks at a broad range of architecture and urbanism in Barcelona providing an understanding of the historical and political contexts that have shaped it It focuses on significant projects built since 1990 as well as providing practical information for visitors Barcelona Architecture Guide, 1929-1994 Antoni González, Raquel Lacuesta, 1995 This series was the winner of the American Institute of Architects prestigious Award for Excellence in International Book Publishing Each volume in this series is introduced with an essay on the architect and a chronological or stylistic presentation of their most outstanding buildings and projects No other series provides such a complete and concise summary of the world's leading architects' works The volumes are fully illustrated in black and white with photos and project renderings Architectural Publications Index, 2003 Bibliographie D'histoire de L'art, 1996
