Burials, Migration and Identity in the Ancient Sahara and Beyond M. C. Gatto, D. J. Mattingly, N. Ray, M. Sterry, 2019-02-14 Places burial traditions at the centre of Saharan migrations and identity debate with new technical data and methodological analysis **Studies in Language Origins** Jan Wind, Edward G. Pulleyblank, Bernhard H. Bichakjian, 1989-01-01 The question of language origin has fascinated people for years Traditionally humanists like linguists and philosophers attempted to solve it with limited success In the last decades however the sciences have begun to study the same question seemingly with more success This book is the result of the activities of a group of scholars members of the Language Origins Society who approach the problem not only from the viewpoint of linguistics but also from that of anatomy physiology social sciences physical anthropology paleoanthropology paleontology comparative zoology general biology ethology evolutionary biology and psychology The volume thus clearly reflects the interdisciplinary approach the Language Origins Society is advocating Since this book is the first of a series meant for the general scholar it attempts to avoid specialist jargon Hence it is equally useful for student courses in linguistics social sciences communication science ethology evolutionary biology and speech therapy *Memorabilia: Jacques A. Danon* R. B. Scorzelli, 1997 Ancient Building Technology, Volume 1: Historical Background G.R.H. Wright, 2022-07-18 The wealth of excavation of ancient buildings in the past 50 years and the resulting flood of publications has created a demand for a survey of building practice in antiquity This two volume work deals with the techniques of setting together the fabric of ancient buildings the manual and mechanical operations involved the materials tools and equipment used Ancient here means from very first beginnings origins to the end of Late Antiquity i.e. about 600 A.D. as manifested geographically in the Old World of Europe and the Middle East not sub-Saharan Africa Further Asia the Far East or New World Building the product and the process is limited to architectural building and looks at the technology of civil engineering only where it introduces novelties Technology here means the system of techniques used in the process of building construction rather than the science or theory of building The 10 chapters of this first volume are intended to give a general perspective of animal building in the light of evolutionary biology then of building in the Palaeolithic Neolithic Mesopotamian Egyptian Levantine Aegean Achaemenid Greek Roman Late Antique Early Christian Byzantine Sassanian contexts with a weighting towards the lesser known prehistoric beginnings and

late antique and The second volume will focus on the technical details materials of construction structural systems principles of construction and forms of construction

Les milieux "naturels" du globe Jean Demangeot, 2009-01-14 Alors qu'aucun livre ne considère les problèmes de l'environnement naturel la fois dans leur globalité et dans leurs particularités régionales concrètes la présente 10^e édition corrigée de ce manuel d'ogographie a l'ambition de combler cette lacune Si la globalité écologique se manifeste bien dans le cosystème il y manque souvent les sociétés humaines qui depuis le Néolithique ont adapté la nature leurs besoins et façonné les paysages Notre Terre est fortement influencée par près de 8 milliards d'humains on ne donc peut craindre naturels qu'entre guillemets Pratiquer une écologie raisonnée oblige la régionalisation des milieux naturels C'est pourquoi le géographe intervient en replaçant les cosystèmes dans leur spécifique régionale et dans leur contexte historique autant que physique Le milieu naturel est donc partie intégrante d'une géographie complète et globale d'autant plus l'heure du changement climatique

Del simio al hombre Jean Chalain, 1997-09-15 Los orígenes y la evolución del hombre se encuentran entre las más importantes incógnitas que nos hemos planteado a lo largo de la historia Hoy la ciencia nos permite aproximarnos a nuestros orígenes de manera novedosa gracias a los últimos descubrimientos paleontológicos y genéticos ya sea mediante el conocimiento de los fósiles y la evolución humana como mediante los vínculos genéticos con nuestra rama hermana los simios La diferenciación en la cronología del desarrollo constituye la gran mecánica evolutiva que permitir resolver esta paradoja y explicar los grandes cambios de forma entre los simios y el hombre Cambios que finalmente terminaran por acentuarse con el desarrollo del pensamiento reflexivo que permitió al hombre dotarse de culturas y ubicarse en un lugar excepcional dentro del mundo de los seres vivos Este libro ofrece un estudio sintético y multidisciplinar del siempre cambiante mundo de la prehistoria humana Riguroso e innovador el libro traza un fascinante viaje desde nuestros más antiguos orígenes hasta la más cercana Antigüedad tanto proponiendo nuevos acercamientos como discutiendo verdades apriorísticas de dudosa validez
