The IFAC TC on Manufacturing Modelling Management and Control MIM was founded on the IFAC World Congress Sydney 1993 The goals of this workshop concerned the development comparison and classification of formal models in the field of Computer Integrated Manufacturing Systems in a descriptive as well as prescriptive way Computer Integrated Manufacturing Systems are able to integrate optimization methods simulation models procedures and knowledge based tools The target for the workshop activities were related to the specification of requirements for new models which are used in simulating and designing manufacturing management and control strategies including discrete event and continuous

representations Technical areas of interest at the system level included tools for plant layout design process planning production planning and control Technical areas of interest at the component level included models for functional description of flexible manufacturing and assembly systems oriented to production activity control process supervision and maintenance
