business side of a commercial enterprise whose field is the entire civilized world Historically the theory and knowledge of shipping management as distinguished from the practical skills of seaman ship have been transmitted from one generation to

the next by word of mouth Little has been put on paper primarily because the finest exponents of the art of steamship management have been too busy with their day to day concerns to do so The working level personnel often are superbly competent but rarely qualify as literary craftsmen It has been my aim in preparing this analysis of the principles of the business of commercial shipping to describe that which transpires in the various divisions of a shipowning and operating organization Insofar as possible the procedures followed in the offices have been described and explained as well as the underlying principles of management by which their decisions are reached In the process of learning the principles and practices that are set forth in these pages I have spent a joy filled lifetime in association with ships It has been my good fortune to work in large and small American steamship offices to operate a major cargo terminal to participate in establishing and putting into effect the policies of a world girdling American steamship organization and to teach young men these principles learned from experience as well as from precept
