Structures of Change in the Mechanical Age Ross Thomson, 2009-05-08 The United States registered phenomenal economic growth between the establishment of the new republic and the end of the Civil War Ross Thomson's fresh study accounts for the

unprecedented technological innovations that helped propel antebellum growth Thomson argues that the transition of the United States from an agrarian economy in 1790 to an industrial leader in 1865 relied fundamentally on the spread of technological knowledge within and across industries Essential to this spread was a dense web of knowledge diffusing institutions new occupations and industries the patent office machine shops mechanics associations scientific societies public colleges and the civil engineering profession Together they composed an integrated innovation system that generated disseminated and employed new technical knowledge across ever widening ranges of the economy To trace technological change in fourteen major industries and the economy as a whole Thomson analyzes 14 000 patents the records of two dozen machinery firms census data for 1 800 companies and hundreds of business directories This exhaustive research leads to his interesting interpretation of technological diffusion and development Thomson s impressive study of the infrastructure that fueled and supported the young country s economic and industrial successes will interest students of economic technological and business history

Thinking About Religion in the 21st Century George C. Adams, Jr.,2024-07-26 The crisis of 21st century religion is upon us With fewer people remaining committed to traditional religions and most new religious movements in their infancy where does that leave the vast silent spiritual majority who find the old religions to be obsolete and the new religions to be not yet credible For everyday people who feel lost between a rejected religion of the past and a still obscure religion of the future Thinking About Religion in the 21st Century suggests that there is indeed another way to look at religion fully informed by 21st century sensibilities that requires no sacrifice of the intellect or abandonment of moral sensibilities The old religions can be set aside and the religions of the future might not yet have evolved into something worthy of full commitment but there already exists a viable evolving alternative spiritual perspective grounded in the elements of everyday ordinary human experience already available

A Theory of Immediate Awareness M.

Estep,2003-05-31 This book presents a realist multidisciplinary and interdisciplinary theory of immediate awareness showing it is the most primitive cognitive network underlying all our natural intelligence Including preattentive and attention processes as well as primitive relations of the senses imagination and memory immediate awareness is a kind of knowing deeply embedded and interwoven throughout our multiple kinds of natural intelligence It permits as well as drives our knowing how our bodily intelligence Against the Cartesian mind body split found in earlier and current theories the author shows how immediate awareness permits emergent properties of mind in multilayered primitive relations of touching and moving in bodily kinesthetic intelligence Contrary to existing theories she argues that sensation is not cognitively neutral nor does it require a representation in order to be accessible to cognitive processes Dr Estep presents empirical evidence and arguments that sensation of immediate awareness is itself cognitive and embedded within our sensory and somatosensory motor processes The author s aim is to turn to a more geometric approach to natural intelligence as opposed to the prevalent symbol based view In this approach she uses random Boolean networks as a way of obtaining law like properties of those

primitive relations of immediate awareness in terms of dynamical systems theory This demonstrates the properties of self organization and adaptation of immediate awareness without committing one to a physicalist materialist theory It gives us a way of understanding core properties of our own inner conscious lives and of understanding the smooth and seamless sensitivity of primitive sensory and somatosensory motor awareness Dr Estep s theory of immediate awareness also shows that the computational view of mind is wrong Though our minds do classify classification is not all they do Our immediate awareness indexically selects sui generis objects that are unique and of no kind or class The influence of nominalism and narrow naturalist theories have resulted in extremely narrow concepts of the human knowing mind and intelligence leaving out immediate awareness altogether We slip into subtle nominalist fallacies when we take our language metaphors and language itself too far

Reclaiming the Soul of Your Faith Randolph W. B. Becker,2022-03-23 Reclaiming the Soul of Your Faith is a provocative invitation for people especially that growing segment of the population who say they are spiritual not religious to examine what a faith looks like beyond the usual confines of organized religion

The Awakening Word Robert W Mitchell,2011-11-23 Are you being called to the spiritual path If so are you doing anything about it I am reminded of the concept faith without works is dead If we are being called to find out wonderful things about ourselves God and the universe we have to do something about it Stepping onto a spiritual path is a way Paths are all about doing In this book you will find many encouraging words about different paths and the rewards and challenges that come with them You will find that paths do not have to be organized or supervised but they must be approached with consciousness and intent and contribute to our lives and the life of the world This book is one of my many paths within my one journey My goal here is to in some way touch those who have not yet found a path or those who may be looking but do not know what they are looking for those who may be wondering about life and God as I was and still do If you are at a place and time in your life where you are wondering or feel as though something is missing this book may be for you It is written for the beginners mind The short easy to read essays poems and inspiring quotes are meant to send your mind off into wonderful directions and your life on amazing paths that allow you to grow and blossom and be the divine person you were meant to be The different chapters address life and how we live it our humanness as well as our divine nature Some of the essays are about the rules of life life as a game or a gamble getting ready for our paths and stepping on to
