The Labors of Sisyphus Joan Roland, 2017-07-05 Almost a half century has passed since the inception of the People s Republic of China In that time a charismatic leader has ruled and died leaving a wake of Destruction in his quest to transform China In that time too the PRC s most powerful ally and mentor the Soviet Union has dismantled and announced that communism had failed Today China fluctuates between tradition and modernity ideology and pragmatism between an antiquated collectivist ethic and a new spirit of individualism It is a country precariously suspended between past and future Maria Hsia Chang s *The Labors of Sisyphus* is a long overdue reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also examines China s immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform Prior accounts of communist China have failed to capture China s evolving present In all its complexity and variety misrepresenting Maoist China In the process Information shortfall was partly to blame as recently as August 1994 the Chinese government itself decried falsification of statistics by government officials and cadres Sinologists in

the 1960s and 1970s had to approach analysis of contemporary China with clear recognition of the limitations involved and the questionable validity of the factual sources available Maria Hsia Chang lends structure meaning and purpose to the very complex recent political and historical past of communist China With greater access to more accurate information Chang is able to analyze objectively without political motive or intention providing readers with a fresh look at the People's Republic Her pathbreaking work will be of interest to scholars of international economics and politics sinologists and historians

Leadership, Legitimacy, and Conflict in China Frederick C Teiwes, 2017-09-29 This title was first published in 1984 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs

The Labors of Sisyphus Maria Hsia Chang, 1999-10-01 Maria Hsia Chang's *The Labors of Sisyphus* is a reassessment of the meaning and purpose of the Chinese communist revolution In it she discusses the thought of Mao Zedong and Deng Xiaoping reform and its dilemmas regionalism in greater China and autonomous areas and nationalism She also examines China's immediate present and uncertain future If it manages to transform economic growth into development China filled with natural resources and a large capable labor force has the potential to become a world superpower It could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity If China succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform

Mao: A Biography Ross Terrill, 1999 Everyone who came in close contact with Mao was taken aback at the anarchy of his personal ways He ate idiosyncratically He became increasingly sexually promiscuous as he aged He would stay up much of the night sleep during much of the day and at times he would postpone sleep remaining awake for thirty six hours or more until tension and exhaustion overcame him Yet many people who met Mao came away deeply impressed by his intellectual reach originality style of power within simplicity kindness toward low level staff members and the aura of respect that surrounded him at the top of Chinese politics It would seem difficult to reconcile these two disparate views of Mao But in a fundamental sense there was no brick wall between Mao the person and Mao the leader This biography attempts to provide a comprehensive account of this powerful and polarizing historical figure

Mao Tse-Tung's Theory of Dialectic F.Y.K. Soo, 2012-12-06 The year 1979 ushered in a new phase in China's long and continuous revolution Currently this new phase is being symbolically referred to by the Chinese leaders themselves as the New Long March a continuation of the legendary and historical Long March in terms of modernization which comprises the Four Modernizations Agriculture Industry Science and Technology and Military Defense Such an all encompassing attempt at modernization may appear to some at least to be something new or may indicate a radical shift in her policy But upon closer examination this decision seems only to reflect an historical continuity in terms of the two major long term goals of the Chinese Revolution national independence and modernization or

industrialization The former would make China strong the latter wealthy For ever since the Opium War in 1840 and throughout the Revolutions of 1911 and 1949 China has always pursued these two revolutionary goals though with different emphases at different times This has been especially true during the past three decades as this twofold goal has dictated all of China's important policies both domestic and foreign In other words while the concrete policies may have appeared to be lacking in unity at times they have been formulated with the specific intent of achieving national independence and modernization From this perspective the New Long March marks the passage of post Mao China beyond the transition of succession toward the continued pursuit of the same revolutionary goals

China Goes to Sea Andrew S. Erickson, Lyle J Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets its vast and expanding merchant marine the wide offshore reach of its energy and minerals exploration companies its growing fishing fleet and indeed its increasingly modern navy Yet for all these achievements there is still profound skepticism regarding China's potential as a genuine maritime power Beijing must still import the most vital subcomponents for its shipyards maritime governance remains severely bureaucratically challenged and the navy evinces at least as of yet little enthusiasm for significant blue water power projection capabilities This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context China is hardly the only land power in history to attempt transformation by fostering sea power Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure Too many works on China view the nation in isolation Of course China's history and culture are to some extent exceptional but building intellectual fences actually hinders the effort to understand China's current development trajectory Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation If that proves indeed to be the case it would be a remarkable if not singular event in the history of the last two millennia

China, the United Nations and World Order Samuel S. Kim, 2015-03-08 China's role in the United Nations has been a significant one Yet Samuel Kim contends as far as the literature on Chinese foreign policy is concerned the People's Republic of China still remains outside the heuristic framework of the global community In a comprehensive macro analysis of Chinese global politics Professor Kim probes China's image and strategy of world order as manifested through its behavior in the UN The author draws upon a wide range of previously untapped primary sources including China's policy pronouncements and voting record and over a hundred personal interviews with UN delegates and international civil servants He finds that Chinese

participation has made the United Nations not only more representative but also more relevant as the global political institution responding to the challenge of establishing a more humane and just world order Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Genocide in the Modern Age Zachary A. Karazsia, 2025-01-30 This book explores why some episodes of mass political violence and genocide are so much deadlier than others and under what conditions perpetrators in government and society opt for brutality as a means of accomplishing their goals Introducing the new concept of mass political violence to explain genocide and other mass killings in the modern world the author investigates how perpetrators sustain the capacity to enact violence on a large scale irrespective of motives Cases including the Holocaust Soviet Union Rwanda Cambodia the Lord s Resistance Army the Islamic State the Ottoman Empire of the 1890s Mao Zedong s revolutionary violence the Congo Crisis and Darfur are used by the author to identify four types of mass political violence perpetrators state actors state society coalitions state sponsored groups and non state actors to explain historical trends and identify which perpetrators are most likely to emerge in a given socio political context and sustain violence over time Comparative and grounded in case studies this book will interest policymakers diplomats governmental advisers practitioners and industry researchers It will also be invaluable to students and scholars of Political Science International Affairs Holocaust and Genocide Studies Human Rights Sociology Anthropology Geography Political Psychology Religious Studies Gender Studies Public Policy Media Studies and Criminology

The Modernization of China Rozman, 1982-08 In the Modernization of China an interdisciplinary team of scholars collaborate closely to provide the first systematic integrated analysis of China in transformation from an agrarian based to an urbanized and industrialized society Moving from the legacy of the Ming and Ch ing dynasties to the reforms and revolutions of the 20th century the authors seek reasons for China s inability to achieve rapid steady growth during a 200 year long struggle to modernize They examine the changing shape of Chinese society the role of the state in local politics military affairs economics the development of the educational system changes in family population and settlement patterns science and technology world views and foreign relations And they make frequent comparisons between China s experience with growth and that of two other latecomers to modernization Japan and Russia The result is a book that brings much needed clarity and perspective to our understanding of China and the way a great civilization attempts to meet the challenge of modernity

Western Dominance and Political Islam Khalid B. Sayeed,1995-01-01 This book challenges prevalent Western media and popular interpretations of Islam Through a political and historical analysis of Saudi Arabia Iran and Pakistan countries that represent the religious ethnic and ideological spectrum of the Muslim world it explores whether or not Islam as a political religion and civilization can provide a preferable alternative to Western capitalist democracy Sayeed argues that although Islamic fundamentalism particularly in its militant and violent form lacks the potential to become such a system some of the major Islamic ideas if reinterpreted and reformulated can provide a viable alternative to Western political and economic dominance especially in the Middle and Near East **Jesus** Hugh Anderson,1967
