**Old Maps & Map Makers of Scotland** John Elliot Shearer, 1905      *Some Notable Surveyors & Map-makers of the Sixteenth, Seventeenth, & Eighteenth Centuries and Their Work* Sir Herbert George Fordham, 1929      Mapmakers Josh Luberisse, 2025-09-30

Every time you tap your phone vote invest money or even define success you re following a protocol an invisible set of rules and categories that someone else designed From TCP IP to GDP from credit scores to carbon credits these reality protocols shape what s possible what s valuable and what s visible Mapmakers reveals that true power in the 21st century doesn t come from controlling territory or resources it comes from controlling the maps everyone else has to navigate by In Mapmakers The Secret Architecture of Money Power and Reality Josh Luberisse pulls back the curtain on these invisible architectures of control Drawing on a groundbreaking new framework called Reality Protocol Theory he reveals that the most significant form of power today is cartographic power the ability to design the maps that everyone else is forced to navigate The winners of the 21st century from tech giants and political movements to influential nations are not just those with the most resources but those who successfully install their map as the default reality for everyone else Mapmakers opens with a puzzle Why did the clunky QWERTY keyboard defeat superior alternatives Why does Facebook s definition of engagement shape global discourse Why do some military interventions fail spectacularly despite overwhelming force The answer lies in understanding protocols the hidden infrastructure of social reality Drawing on examples from Silicon Valley boardrooms to failed nation building efforts from cryptocurrency battles to ESG standards wars the book shows how protocols work they compress messy reality into manageable maps but whoever draws the map decides what matters We meet the protocol entrepreneurs the standards setters platform builders and framework designers who shape how billions of people see and navigate the world The book reveals the recurring patterns why thin flexible protocols like internet standards spread globally while thick prescriptive ones like imposed governmental systems face resistance Why metrics inevitably corrupt the systems they measure Goodhart s Law How dominant protocols become invisible feeling like just how things are rather than choices someone made The stakes crescendo as we explore contemporary protocol wars Who will define AI alignment and thus humanity s future Whose sustainability metrics will direct trillions in investment Which digital identity standards will determine privacy and freedom for billions These aren t technical debates they re contests for control of the operating system of civilization The book concludes with a practical framework how to recognize when you re living inside someone else s map how to evaluate competing protocols and how to participate in or resist the protocol wars shaping our future In an age where reality itself seems up for grabs understanding protocols isn t just intellectual it s survival Why Now In an era of alternative facts platform power AI governance debates and competing metaverses people sense that reality itself has become contested terrain This book names what they re feeling we re living through a massive renegotiation of the protocols that organize civilization From social media algorithms to ESG standards from cryptocurrency to AI alignment the

protocol wars will determine the next century After reading this book you ll never see a metric standard platform or framework the same way You ll understand why some changes feel impossible protocol lock in and others happen overnight protocol collapse Most importantly you ll recognize when someone is trying to install their map in your head and you ll know what to do about it     **The Map-maker** Keki N. own maps and chart new paths toward stronger more vibrant and more missional congregations In the burgeoning missional church movement churches are seeking to become less focused on programs for members and more oriented toward outreach to people who are not already in church This fundamental shift in what a congregation is and does and thinks is challenging for leaders and congregants Using the metaphor of map making the book explains the perspective and skills needed to lead congregations and denominations in a time of radical change over unfamiliar terrain as churches change their focus from internal to external Offers a clear guide for leaders wanting to transition to a missional church model Written by Alan Roxburgh a prominent expert and practitioner in the missional movement Guides leaders seeking to create new maps for leadership and church organization and focus A Volume in the popular Leadership Network Series This book is written to be accessible to all Christian congregational styles and denominations     *The Mapmakers* Tamzin Merchant,2022-05-03
