Mapmakers of the Sixteenth Century and Their Maps Robert W. Karrow, 1993 **Some Notable Surveyors &** Map-makers of the Sixteenth, Seventeenth, & Eighteenth Centuries and Their Work Sir Herbert George The New World in Early Modern Italy, 1492-1750 Elizabeth Horodowich, Lia Markey, 2017-11-16 This volume considers Italy s history and examines how Italians became fascinated with the New World in the early modern period General Maps of Persia 1477 - 1925 Cyrus Alai, 2021-12-06 Martin Waldseemüller's 'Carta marina' of 1516 Chet Van Duzer, 2019-10-09 This open access book presents the first detailed study of one of the most important masterpieces of Renaissance cartography Martin Waldseem ller's Carta marina of 1516 By transcribing translating into English and detailing the sources of all of the descriptive texts on the map as well as the sources of many of the images the book makes the map available to scholars in a wholly unprecedented way In addition the book provides revealing insights into how Waldseem ller went about making the map information that can t be found in any other source The Carta marina is the result of Waldseem ller's radical re evaluation of what a world map should be he essentially started from scratch when he created it rejecting the Ptolemaic model and other sources he had used in creating his 1507 map and added more descriptive texts and a wealth of illustrations Given its content the book offers an essential reference work not only on this map but also for anyone working in sixteenth century European cartography A Companion to Venetian History, 1400-1797, 2013-07-11 The field of Venetian studies has experienced a significant expansion in recent years and the Companion to Venetian History 1400 1797 provides a single volume overview of the most recent developments It is organized thematically and covers a range of topics including political culture economy religion gender art literature music and the environment Each chapter provides a broad but comprehensive historical and historiographical overview of the current state and future directions of research The Companion to Venetian History 1400 1797 represents a new point of reference for the next generation of students of early modern Venetian studies as well as more broadly for scholars working on all aspects of the early modern world Contributors are Alfredo Viggiano Benjamin Arbel Michael Knapton Claudio Povolo Luciano Pezzolo Anna Bellavitis Anne Schutte Guido Ruggiero Benjamin Ravid Silvana Seidel Menchi Cecilia Cristellon David D Andrea Elisabeth Crouzet Pavan Wolfgang Wolters Dulcia Meijers Massimo Favilla Ruggero Rugolo Deborah Howard Linda Carroll Jonathan Glixon Paul Grendler

Unger, 2010-08-04 Renaissance map makers produced ever more accurate descriptions of geography which were also beautiful works of art They filled the oceans Europeans were exploring with ships and to describe the real ships which were the newest and best products of technology Above all the ships were there to show the European conquest of the seas of the world Geographical Knowledge and Imperial Culture in the **Early Modern Ottoman Empire** Asst Prof Pinar Emiralioglu, 2014-03-28 Exploring the reasons for a flurry of geographical works in the Ottoman Empire in the sixteenth century this study analyzes how cartographers travellers astrologers historians and naval captains promoted their vision of the world and the centrality of the Ottoman Empire in it It proposes a new case study for the interconnections among empires in the period demonstrating how the Ottoman Empire shared political cultural economic and even religious conceptual frameworks with contemporary and previous world empires The Mapmakers' **Quest** David Buisseret, 2003-05-22 In 1400 Europe was behind large parts of the world in its understanding of the use of maps For instance the people of China and of Japan were considerably more advanced in this respect And yet by 1600 the Europeans had come to use maps for a huge variety of tasks and were far ahead of the rest of the world in their appreciation of the power and use of cartography The Mapmakers Quest seeks to understand this development not only to tease out the

strands of thought and practice which led to the use of maps but also to assess the ways in which such use affected European societies and economies Taking as a starting point the question of why there were so few maps in Europe in 1400 and so many by 1650 the book explores the reasons for this and its implications for European history It examines inter all how mapping and military technology advanced in tandem how modern states territories were mapped and borders drawn up the role of maps in shaping the urban environment and cartography s links to the new sciences English Maps and Map-makers of the Sixteenth Century Edward Lynam, 1950 Antique Map Price Record & Handbook for ...
