Mapping And Sequencing The Human Genome:

Mapping and Sequencing the Human Genome National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Mapping and Sequencing the Human Genome, 1988-01-01 There is growing enthusiasm in the scientific community about the prospect of mapping and sequencing the human genome a monumental project that will have far reaching consequences for medicine biology technology and other fields But how will such an effort be organized and funded How will we develop the new technologies that are needed What new legal social and ethical questions will be raised Mapping and Sequencing the Human Genome is a blueprint for this proposed project The authors offer a highly readable explanation of the technical aspects of genetic mapping and sequencing and they recommend specific interim and long range research goals organizational strategies and funding levels They also outline some of the legal and social questions that might arise and urge their early consideration by policymakers Mapping and Sequencing the Human Genome Committee

Mapping Our Genes , 1988 *Gene Mapping* George J. Annas, Sherman Elias, 1992 This timely work brings together a group of the nation s leading experts in genetics medicine history of science health law philosophy of science and medical ethics to assess the current state of modern human genetics and to begin to chart the legal and ethical guidelines needed to prevent the misuse of human genetics from leading to the abuse of human beings The six sections of the book read together map the social policy contours of modern human genetics The first part describes the science of the Human Genome Project The second addresses specific social policy implications including the relevance of recombinant DNA history the eugenics legacy military applications and issues of race and class in the context of genetic discrimination Broader philosophical issues including reductionism and determinism the concept of disease and using germline gene therapy to improve human beings are discussed in the third part Drawing the Map of Life Victor K. McElheny, 2010-10-19 Drawing the Map of Life is the dramatic story of the Human Genome Project from its origins through the race to order the 3 billion subunits of DNA to the

surprises emerging as scientists seek to exploit the molecule of heredity It s the first account to deal in depth with the intellectual roots of the project the motivations that drove it and the hype that often masked genuine triumphs Distinguished science journalist Victor McElheny offers vivid insightful profiles of key people such as David Botstein Eric Lander Francis Collins James Watson Michael Hunkapiller and Craig Venter McElheny also shows that the Human Genome Project is a striking example of how new techniques such as restriction enzymes and sequencing methods often arrive first shaping the questions scientists then ask Drawing on years of original interviews and reporting in the inner circles of biological science Drawing the Map of Life is the definitive up to date story of today s greatest scientific quest No one who wishes to understand genome mapping and how it is transforming our lives can afford to miss this book **Drawing the Map of Life**
