OTA Publications United States. Congress. Office of Technology Assessment, 1989

The Code of Codes Daniel J. Kevles, Leroy E. Hood, 1992 The ultimate goal of the pioneering project outlined in this book is to map our genome the key to what makes us human in detail The Code of Codes is a collective exploration of the substance and possible consequences of this project in relation to ethics law and society

Scientific Innovation, Philosophy, and Public Policy: Volume 13, Part 2 Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 1996-06-28 Recent and ongoing developments in science and technology such as the prevention and treatment of disease through genetics and the development of increasingly sophisticated computer systems with wide ranging applications hold out the promise of vastly improving the quality of human life but they can also raise serious ethical legal and public policy questions The thirteen essays in this volume address these questions and related issues from a variety of perspectives

Standard of Care George J. Annas, 1997 American law not philosophy or medicine is the major force shaping American bioethics This is both because law at its best fosters individual rights equality and justice and because violation of the legal duty or standard of care a physician owes a patient can lead to a malpractice suit The law has therefore had two conflicting impacts on medical ethics the positive effect of eroding paternalism and replacing it with a patient centered ethic and the negative effect of encouraging physicians to be more concerned with avoiding litigation than doing the right thing Standard of Care explores the fundamental value conflicts confronting medicine and society by examining courtroom resolutions of real bioethical disputes often of constitutional dimension This case based approach which ranges from abortion to euthanasia from AIDS to organ transplantation from genetic research to the artificial heart and rationing illuminates the value choices with which the power and impotence of medicine confronts us George Annas urges health care professionals to go beyond the minimalist legal standard of care by promoting a vigorous patient centered medical ethics based on respect for human rights and responsibility to both patients and society If modern medicine is to enhance human life a reconceptualization of law as the beginning of ethical discourse rather than as an instrument to end it is essential Such a discourse could enrich all our lives by helping us to articulate both a national and international agenda for human rights in health

The Christian Religion and Biotechnology George P. Smith, 2005-03-21 Religion is a dominant force in the lives of many Americans It animates challenges directs and shapes as well the legal political and scientific agendas of the new Age of Biotechnology In a very real way religion biomedical technology and law are epistemologically different Yet they are equal vectors of force in defining reality and approaching an understanding of it Indeed all three share a synergetic relationship for they seek to understand and improve the human condition This book strikes a rich balance between thorough analysis in the

body anchored in sound references to religion law and medical scientific analysis and a strong scholarly direction in the end notes It presents new insights into the decision making processes of the new Age of Biotechnology and shows how religion law and medical science interact in shaping directing and informing the political processes This volume will be of interest to both scholars and practitioners in the fields of religion and theology philosophy ethics family law science medicine political science and public policy and gender studies It will serve as a reference source and can be used in graduate and undergraduate courses in law medicine and religion

Genetics and Evolution of Infectious Diseases Michel Tibayrenc, 2010-12-17 Genetics and Evolution of Infectious Diseases is at the crossroads between two major scientific fields of the 21st century evolutionary biology and infectious diseases The genomic revolution has upset modern biology and has revolutionized our approach to ancient disciplines such as evolutionary studies In particular this revolution is profoundly changing our view on genetically driven human phenotypic diversity and this is especially true in disease genetic susceptibility Infectious diseases are indisputably the major challenge of medicine When looking globally they are the number one killer of humans and therefore the main selective pressure exerted on our species Even in industrial countries infectious diseases are now far less under control than 20 years ago The first part of this book covers the main features and applications of modern technologies in the study of infectious diseases The second part provides detailed information on a number of the key infectious diseases such as malaria SARS avian flu HIV tuberculosis nosocomial infections and a few other pathogens that will be taken as examples to illustrate the power of modern technologies and the value of evolutionary approaches Takes an integrated approach to infectious diseases Includes contributions from leading authorities Provides the latest developments in the field

Highlights ,1985

Decoding **Mapping Our Genes Genome Projects How Big How Fast**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Mapping Our Genes Genome Projects How Big How Fast**," a mesmerizing literary creation penned by a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring affect our lives. In this appraisal, we shall explore the book is central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
