of statecraft Subsequent iterations have considered the role that popular representations of the international political world play As critical geopolitics has become a more established part of political geography it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice Again critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas non representational theory emotional geographies and affect It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics

*Politics* Virginie Mamadouh, 2017-05-15 Depending on the breadth or narrowness of the understanding of politics and the political politics in

human geography is defined as either the operation of power in all social relations or the workings of power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale social movements and electoral participation and identities and citizenship Dilemmas of Difference Sarah A.

Radcliffe,2015-10-23 In *Dilemmas of Difference* Sarah A Radcliffe explores the relationship of rural indigenous women in Ecuador to the development policies and actors that are ostensibly there to help ameliorate social and economic inequality Radcliffe finds that development policies inability to recognize and reckon with the legacies of colonialism reinforces long standing social hierarchies thereby reproducing the very poverty and disempowerment they are there to solve This ineffectiveness results from failures to acknowledge the local population s diversity and a lack of accounting for the complex intersections of gender race ethnicity class and geography As a result projects often fail to match beneficiaries needs certain groups are made invisible and indigenous women become excluded from positions of authority Drawing from a mix of ethnographic fieldwork and postcolonial and social theory Radcliffe centers the perspectives of indigenous women to show how they craft practices and epistemologies that critique ineffective development methods inform their political agendas and shape their strategic interventions in public policy debates **Territory, the State and Urban Politics** Andrew

Wood,2016-03-09 Following its rise to prominence in the 1990s work on territory the state and urban politics continues to be a vibrant and dynamic area of academic concern Focusing heavily on the work of one key influential figure in the development of the field Kevin R Cox this volume draws together a collection of prominent and well established scholars to reflect on the development and state of the field and to establish a research agenda for future work *Feminist Spaces* Ann

Oberhauser,Jennifer Fluri,Risa Whitson,Sharlene Mollett,2017-09-27 *Feminist Spaces* introduces students and academic researchers to major themes and empirical studies in feminist geography It examines new areas of feminist research including embodiment sexuality masculinity intersectional analysis and environment and development In addition to considering gender as a primary subject this book provides a comprehensive overview of feminist geography by highlighting contemporary research conducted from a feminist framework which goes beyond the theme of gender to include issues such as social justice activism dis ability and critical pedagogy Through case studies this book challenges the construction of dichotomies that tend to oversimplify categories such as developed and developing urban and rural and the Global North and South without accounting for the fluid and intersecting aspects of gender space and place The chapters weave theoretical and empirical material together to meet the needs of students new to feminism as well as those with a feminist background but new to geography through attention to basic geographical concepts in the opening chapter The text encourages readers

to think of feminist geography as addressing not only gender but a set of methodological and theoretical perspectives applied to a range of topics and issues A number of interactive exercises activities and boxes or case studies illustrate concepts and supplement the text These prompts encourage students to explore and analyze their own positionality as well as motivate them to change and impact their surroundings Feminist Spaces emphasizes activism and critical engagement with diverse communities to recognize this tradition in the field of feminism as well as within the discipline of geography Combining theory and practice as a central theme this text will serve graduate level students as an introduction to the field of feminist geography and will be of interest to students in related fields such as environmental studies development and women s and gender studies
