**The Mapmakers** John Noble Wilford, 2001-12-04 In his classic text two time Pulitzer Prize winner John Noble Wilford recounts the history of cartography from antiquity to the space age They are among the world s great pioneers and adventurers the mapmakers who for centuries have been expanding our knowledge of who and where we are and where we want to go From the surprisingly accurate silk maps prepared by Chinese cartographers in the second century B C to medieval mapmakers who believed they had fixed the location of paradise through to the expeditions of Columbus and Magellan John Noble Wilford chronicles the exploits of the great pioneers of mapmaking Wilford brings the story up to the present day as he shows the impact of new technologies that make it possible for cartographers to go where no one has been before from the deepest reaches of the universe where astronomers are mapping time as well as space to the inside of the human brain These modern day mapmakers join the many earlier adventurers including ancient Greek stargazers Renaissance seafarers and the explorers who mapped the American West whose achievements shape this dramatic story of human inventiveness and limitless curiosity      Fundamentals of Cartography (Second Revised and Enlarged Edition) R.P. Misra, 2014-01-01 The first edition of Fundamentals of Cartography was published in 1969 by Prasara University of Mysore It was reprinted by the Concept Publishing Company New Delhi in While the book remained in currency the cartographic processes changed drastically when information technology brought a sea of change in the sources of information drafting of maps and printing processes Drawing maps by hand became obsolete surveying whether ground or aerial was no longer the only major source of information In view of these changes it became necessary to bring out a new edition Realising that unless one knows directions scales projections coordinates ground and air surveys one would fail to understand the proper use of modern information technology in the drawing the maps Thus the contents of 1969 edition are retained and new chapters have been added to update the book In Part II of the book a chapter on Remote Sensing and Satellite Imagery has been added and Part V contains chapters on Computer Aided Cartography Geographic Information System GIS Land Information System LIS and Global Positioning System GPS      **The Best of Internet Activities, Second Edition** Teacher Created Resources, Inc, 2003-10-07 Choose from a huge assortment of lesson plans based on Web sites that are both informative and entertaining Curriculum driven activities cover a wide range of topics to engage students of all ages

**Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin, 1997-07-31 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi **PERSONAL NOTE FROM THE EDITOR** Many years ago I taught African history at a secondary school in Central Africa
