Marc Bloch Sociology And Geography Encountering Changing Disciplines:

Marc Bloch, Sociology and Geography Susan W. Friedman, 2004-11-11 The French historian Marc Bloch has often been praised for his interdisciplinary approach This book demonstrates the importance of both Vidalian geography and Durkheimian sociology for Bloch and the significant but often overlooked differences between his approach and theirs In contrast to much other work on Bloch Professor Friedman highlights the intellectual and institutional contexts of Bloch's works arguing that only by a careful examination of the debates in which he was involved can one begin to come to terms with the nature of his contribution

L'École des Annales André Burguière, 2006-09-01 De Marc Bloch Emmanuel Leroy Ladurie et Jacques Le Goff de Lucien Febvre Philippe Ariès et Michel Foucault de Fernand Braudel Ernest Labrousse L'École des Annales a profondément renouvelé l'historiographie française et internationale Au lieu de décrire une période historique un événement les faits d'armes d'un roi ou d'un empereur les heurs et les malheurs d'une nation L'École des Annales a entrepris d'étudier des problèmes Peut-on être incroyant l'époque de Rabelais Pourquoi la France n'a-t-elle jamais été la première puissance économique Dans ce livre André Burguière montre comment cette école s'est constituée autour de l'étude des mentalités Structures motrices et cognitives représentations et images inconscientes les mentalités restituent les sociétés disparues dans les catégories à l'aide desquelles elles se pensaient elles-mêmes L'Histoire ou la pensée des autres André Burguière directeur d'études L'École des hautes études en sciences sociales est membre de la rédaction des Annales

The Selected Writings of Marc Bloch Iona Singh, 2025-02-20 This book brings a selection of the influential writings of Marc Bloch into the English language largely for the very first time Chronologically arranged to trace the developmental arc of Bloch's historical philosophy the translations in *The Selected Writings of Marc Bloch* offer an illuminating insight into the theories of a pioneer historian and original founder of the renowned Annales school of French social history The carefully curated translations in this volume reveal Bloch's thoughts on questions that historical studies has grappled with since the birth of the discipline Why should history exist at all What value does it have What exactly is a science of history What is the actual role of the historian in historical studies This collection presents Bloch's precise understanding of the contours of the discipline of history defined by the abutment and transgression of its borders by other subjects Consequently it provides a theoretical underpinning for multidisciplinary and interdisciplinary concepts via historical studies pulling into its fold diverse themes such as customs agriculture economics nutrition technology manners art fashion and countless other topics explored by Bloch himself in the process

the basis of his ideas The essays are divided into three quartets of studies relating to England France and the United States

Visions of Kinship in Medieval Europe Hans Hummer,2018-04-26 What meaning did human kinship possess in a world regulated by Biblical time committed to the primacy of spiritual relationships and bound by the sinews of divine love In the process of exploring this question Hans Hummer offers a searching re examination of kinship in Europe between late Roman times and the high middle ages the period bridging Europe s primitive past and its modern future Visions of Kinship in Medieval Europe critiques the modernist and Western bio genealogical and functionalist assumptions that have shaped kinship studies since their inception in the nineteenth century when Biblical time collapsed and kinship became a signifier of the essential secularity of history and a method for conceptualizing a deep prehistory guided by autogenous human impulses Hummer argues that this understanding of kinship is fundamentally antagonistic to medieval sentiments and is responsible for the frustrations researchers have encountered as they have tried to identify the famously elusive kin groups of medieval Europe He delineates an alternative ethnographic approach inspired by recent anthropological work that privileges indigenous expressions of kinship and the interpretive potential of native ontologies This study reveals that kinship in the middle ages was not biological primitive or a regulator of social mechanisms nor was it traceable by bio genealogical connections In the Middle Ages kinship signified a sociality that flowed from convictions about the divine source of all things and which wove together families institutions and divinities into an expansive eschatological vision animated by the most righteous principle of love

Fraternity Among the French Peasantry Alan R. H. Baker,2004-03-18 The individualism of the French peasantry during the nineteenth century has frequently been asserted as one of its most striking characteristics In this 1999 book Alan Baker challenges this orthodox view and demonstrates the extent to which peasants continued with traditional and developed new forms of collective action He examines representations of the peasantry and discusses the discourse of fraternity in nineteenth century France in general before considering specifically the historical development geographical diffusion and changing functions of fraternal voluntary associations in Loir et Cher between 1815 and 1914 Alan Baker focuses principally upon associations aimed at reducing risk and uncertainty and upon associations intended to provide agricultural protection A wide range of new voluntary associations were established in Loir et Cher and indeed throughout rural France during the nineteenth century Their historical geography throws new light upon the sociability upon the changing mentalit s of French peasants and upon the role of fraternal associations in their struggle for survival

Deadly Documents Mark Ward,2016-12-05 Scholars teachers and practitioners of organizational professional and technical communication and rhetoric are target audiences for a new book that reaches across those disciplines to explore the dynamics of the Holocaust More than a history the book uses the extreme case of the Final Solution to illumine the communicative constitution of organizations and to break

new ground on destructive organizational communication and ethics **Deadly Documents** Technical Communication Organizational Discourse and the Holocaust Lessons from the Rhetorical Work of Everyday Texts starts with a microcosmic look at a single Nazi bureau Through close rhetorical visual and discursive analyses of organizational and technical documents produced by the SS Security Police Technical Matters Group the bureau that managed the Nazi mobile gas van program author Mark Ward shows how everyday texts functioned as boundary objects on which competing organizational interests could project their own interpretations and temporarily negotiate consensus for their parts in the Final Solution The initial chapters of **Deadly Documents** provide a historical ethnography of the SS technical bureau by closely describing the institutional and organizational cultures in which it operated and relating organizational stories told in postwar testimony by the desk murderers themselves Then through examination of the primary material of their documents Ward demonstrates how this Social Darwinist world of competing Nazi bureaucrats deployed rhetorical and linguistic resources to construct a social reality that normalized genocide Ward goes beyond the usual Weberian bureaucratic paradigm and applies to the problem of the Holocaust both the interpretive view that sees organizations as socially constructed through communication and the postmodern view that denies the notion of a preexisting social object called an organization and instead situates it within larger discourses The concluding chapters trace how contemporary scholars of professional communication have wrestled with the Nazi case and developed a consensus explanation that the desk murderers were amoral technocrats Though the explanation is dismissed by most historians it nevertheless offers Ward argues a comforting distance between us and them Yet as Ward writes First we will learn more about the dynamic role of everyday texts in organizational processes Second as we see these processes perhaps inherent to all organized communities including our own at work even in the extreme case of the SS Technical Matters Group the comforting distance that we now maintain between them and us is necessarily diminished And third our newfound discomfort may open productive spaces to revisit conventional wisdoms about the ethics of technical and organizational communication

Governmentality and the Mastery of Territory in

Nineteenth-Century America Matthew G. Hannah, 2000-09-14 Matthew Hannah's book focuses on late nineteenth century America the period of transformation which followed the Civil War and gave birth to the twentieth century This was a time of industrialization and urbanization Immigration was on the increase and traditional hierarchies were being challenged Using a combination of empirical and theoretical material Hannah explores the modernization of the American federal government during this period Discussions of gender race and colonial knowledge engage with Foucault's ideas on governmentality The empirical strands of the narrative surround the career and writing of Francis A. Walker A hugely influential figure at that time Walker was Director of the 1870 and 1880 US censuses Commissioner of Indian affairs and a prominent political economist and educator Through an analysis of his work Hannah enriches previous interpretations of the period demonstrating that the modernization of the American national state was a thoroughly spatial and explicitly geographical project *Impure and*

Worldly Geography Gavin Bowd, Daniel Clayton, 2019-02-13 Tropicality is a centuries old Western discourse that treats otherness and the exotic in binary us and them terms It has long been implicated in empire and its anxieties over difference However little attention has been paid to its twentieth century genealogy This book explores this neglected history through the work of Pierre Gourou one of the century s foremost purveyors of what anti colonial writer Aim C saire dubbed tropicalit It explores how Gourou s interpretations of the nature of the tropical world and its innate difference from the temperate world were built on the shifting sands of twentieth century history empire and freedom modernity and disenchantment war and revolution culture and civilisation and race and development The book addresses key questions about the location and power of knowledge by focusing on Gourou s cultivation of the tropics as a romanticised networked and affective domain The book probes what C saire described as Gourou s impure and worldly geography as a way of opening up interdisciplinary questions of geography ontology epistemology experience and materiality This book will be of great interest to scholars and students within historical geography history postcolonial studies cultural studies and international relations

New Contributions to the Philosophy of History Daniel Little, 2010-08-05 Insights developed in the past two decades by philosophers of the social sciences can serve to enrich the challenging intellectual tasks of conceptualizing investigating and representing the human past Likewise intimate engagement with the writings of historians can deepen philosophers understanding of the task of knowing the past This volume brings these perspectives together and considers fundamental questions such as What is historical causation What is a large historical structure How can we best conceptualize mentalities and identities What is

involved in understanding the subjectivity of historical actors What is involved in arriving at an economic history of a large region How are actions and outcomes related The arguments touch upon a wide range of historical topics the Chinese and French Revolutions the extension of railroads in the nineteenth century and the development of agriculture in medieval China

Ireland, the Great War and the Geography of Remembrance Nuala C. Johnson, 2003-05-29 Nuala C Johnson explores the complex relationship between social memory and space in the representation of war in Ireland The Irish experience of the Great War and its commemoration is the location of Dr Johnson's sustained and pioneering examination of the development of memorial landscapes and her study represents a major contribution both to cultural geography and to the historiography of remembrance Attractively illustrated this book combines theoretical perspectives with original primary research showing how memory literally took place in post 1918 Ireland and the various conflicts and struggles that were both a cause and effect of this process Of interest to scholars in a number of disciplines Ireland The Great War and The Geography of Remembrance shows powerfully how Irish efforts to collectively remember the Great War were constantly in dialogue with issues surrounding the national question and the memorials themselves bore witness to these tensions and ambiguities
