Industrial design has the potential to enrich our daily lives to improve the quality of our relationship to the artificial environment of technology and even argues Dunne to be subverted for socially beneficial ends The cultural speculations and conceptual design proposals in Hertzian Tales are not utopian visions or blueprints instead they embody a critique of present day practices mixing criticism with optimism Six essays explore design approaches for developing the aesthetic potential of electronic products outside a commercial context considering such topics as the post optimal object and the aesthetics of user unfriendliness and five proposals offer commentary in the form of objects videos and images These include Electroclimates animations on an LCD screen that register changes in radio frequency When Objects Dream consumer products that dream in electromagnetic waves Thief of Affection which steals radio signals from cardiac pacemakers Tuneable Cities which uses the car as it drives through overlapping radio environments as an interface of hertzian and physical space and the Faraday Chair Negative Radio enclosed in a transparent but radio opaque shield Very little has changed in the world of design since Hertzian Tales was first published by the Royal College of Art in 1999 writes Dunne in his preface to this MIT Press edition Design is not engaging with the social cultural and ethical implications of the technologies it makes so sexy and consumable His project and proposals challenge it to do so Multidisciplinary Aspects of Design Francesca Zanella, Giampiero Bosoni, Elisabetta Di Stefano, Gioia Laura Iannilli, Giovanni Matteucci, Rita Messori, Raffaella Trocchianesi, 2023-12-30 This open access book gathers the contributions from the Design OPEN International Conference held in Parma Italy in May 2022 The conference explored the multidisciplinary aspects of design starting from its dimensions objects design as focused on the object on its functional and symbolic dimension and at the same time on the object as a tool for representing cultures processes the designer's self reflective moment which is focused on the analysis and on the definition of processes in various contexts spanning innovation social engagement reflection on emergencies or forecasting experiences design as a theoretical and practical strategy aimed at facilitating experiential interactions among people people and objects or environments and narratives making history representing through different media archiving narrating and exhibiting design The contributions which were selected by means of a rigorous international peer review process highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists **Science and Art: The Contemporary Painted Surface** Antonio Sgamellotti, Brunetto Giovanni Brunetti, Costanza Miliani, 2020-07-01 *Analogue* Deyan Sudjic, 2024-03-14 A celebration of all things analogue from reel to reel tape recorders and turntables to typewriters and telephones **Chairs** Otakar Máčel, Sander Woertman, Charlotte van Wijk, 2008 The Faculty of Architecture of the TU Delft can pride itself on one of the foremost furniture collections in the Netherlands Set up as an educational tool the collection has offered knowledge about materials construction and typology to students and designers for more than a century In this catalogue the entire collection of over 240 chairs is presented for the first time Each object is accompanied by a thorough description Also the book offers

Ogata, 2013-04-21 The postwar American stereotypes of suburban sameness traditional gender roles and educational conservatism have masked an alternate self image tailor made for the Cold War The creative child an idealized future citizen was the darling of baby boom parents psychologists marketers and designers who saw in the next generation promise that appeared to answer the most pressing worries of the age *Designing the Creative Child* reveals how a postwar cult of childhood creativity developed and continues to this day Exploring how the idea of children as imaginative and naturally creative was constructed disseminated and consumed in the United States after World War II Amy F Ogata argues that educational toys playgrounds small middle class houses new schools and children s museums were designed to cultivate imagination in a growing cohort of baby boom children Enthusiasm for encouraging creativity in children countered Cold War fears of failing competitiveness and the postwar critique of social conformity making creativity an emblem of national revitalization Ogata describes how a historically rooted belief in children s capacity for independent thinking was transformed from an elite concern of the interwar years to a fully consumable and aspirational ideal that persists today From building blocks to Gumby playhouses to Playskool trains Creative Playthings to the Eames House of Cards Crayola fingerpaint to children s museums material goods and spaces shaped a popular understanding of creativity and *Designing the Creative Child* demonstrates how this notion has been woven into the fabric of American culture
