Natural History Of The Chicago Region:

A Natural History of the Chicago Region Joel Greenberg, 2002 In A Natural History of the Chicago Region Greenberg takes you on a journey that begins with European explorers and settlers and hasn't ended yet Along the way he introduces you to the physical forces that have shaped the area from southeastern Wisconsin to northern Indiana and Berrien County in Michigan the various habitat types present in the region and how European settlement has affected them and the insects reptiles amphibians birds fish and mammals found in presettlement times then amid the settlers and now amid the skyscrapers In all Greenberg chronicles the development of nineteen counties in Illinois Michigan and Wisconsin across centuries of ecological technological and social transformations BOOK JACKET **Fishes of the Chicago Region** Francis M. Veraldi, Stephen M. Pescitelli, Philip W. Willink, 2025-06-03 A treasure of hardcore fish intelligence and delightful tidbits of fish history Dale Bowman Chicago Sun Times Fish don't heed state boundaries and neither does this comprehensive photo filled guide to the diverse species of Chicago and beyond Encompassing southern Lake Michigan northeastern Illinois and adjacent areas of Indiana Michigan and Wisconsin the Chicago Region is home to rare habitats supporting diverse fish populations From small creeks to large rivers and from small ponds to one of the world's largest freshwater ecosystems Lake Michigan these systems are home to some 164 fish species representing 31 families In this essential field guide the most complete and up to date reference for fishes in the Chicago Region we meet them all lampreys sturgeon paddlefish gars drum darters perches sticklebacks sculpins and more Written by leading local ecologists and featuring a pictorial family key color photographs detailed species distribution maps and natural history observations unique to the region this guide belongs on the shelf and in the boat of every angler naturalist fisheries manager and biologist *A Partial Bibliography of the Natural History of the Chicago Region* Louise Gertrude Isfort, 1943 The Higher Fungi of the Chicago Region ... Will Sayer Moffatt, 1909 *Wide Rivers Crossed* Ellen Wohl, 2013-05-15 In *Wide Rivers Crossed* Ellen Wohl tells the stories of two rivers the South Platte on the western plains and the Illinois on the eastern to represent the environmental history and historical transformation of major rivers across the American prairie Wohl begins with the rivers natural histories including their geologic history physical characteristics ecological communities and earliest human impacts and follows a downstream and historical progression from the use of the rivers resources by European immigrants through increasing population density of the twentieth century to the present day The environmental changes in the South Platte and the Illinois reflect the relentless efforts by humans to control the distribution of water to enhance surface water in the arid western prairie and to limit the spread of floods and drain the wetlands along the rivers in the water abundant east In addition during the past two centuries crops replaced native vegetation excess snowmelt and rainfall carried fertilizers and pesticides into streams and levees dams and drainage altered distribution These changes cascaded through networks starting in small headwater tributaries and reduced the ability of rivers to supply the clean water fertile soil and natural habitats they had provided for

centuries Understanding how these rivers and rivers in general function and how these functions have been altered over time will allow us to find innovative approaches to restoring river ecosystems Wide Rivers Crossed looks at these historical changes and discusses opportunities for much needed protection and restoration for the future South Suburban Airport, Chicago Region, Draft Environmental Assessment (EA) B1(3v); Phase I Engineering Report Summary Draft B2; Letter of Transmittal and Press Release B3; Final Environmental Assessment (EA) ,1998

Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities Thomas Elmqvist,Michail Fragkias,Julie Goodness,Burak Güneralp,Peter J. Marcotullio,Robert I. McDonald,Susan Parnell,Maria Schewenius,Marte Sendstad,Karen C. Seto,Cathy Wilkinson,2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process It is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global The book is a global assessment and delivers four main conclusions Urban areas are expanding faster than urban populations Half the increase in urban land across the world over the next 20 years will occur in Asia with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity Urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services

Urban Wildscapes Anna Jorgensen,Richard Keenan,2012-03-12 Evolved rather than designed or planned these derelict abandoned and marginal spaces or wildernesses are frequently overgrown with vegetation and host to a wide range of human activities They include former industrial sites landfill allotments cemeteries woods infrastructural corridors vacant lots and a whole array of urban waste lands at a variety of different scales Frequently maligned in the media these landscapes have recently been re evaluated and this collection combines these fresh perspectives in one volume Includes around 100 colour images

Earth Shapers Maxim Samson,2025-10-13 The globetrotting story of how humans have harnessed the geographical landscape and written ourselves onto our surroundings Mountains meridians rivers and borders these are some of the features that divide the world on our maps and in our minds But geography is far less set in stone than we might believe and as Maxim Samson s Earth Shapers contends in our relatively short time on this planet humans have become experts at fundamentally reshaping our surroundings From the Qhapaq an the Inca s great road and Mozambique s colonial railways to a Saudi Arabian smart city and from Korea s sacred Baekdu daegan mountain range and the Great Green Wall in Africa to the streets of Chicago Samson explores how we mold the world around us And how as we etch our needs onto the natural landscape we alter the course of history These fascinating stories of connectivity show that in

our desire to make geographical connections humans have broken through boundaries of all kinds conquered treacherous terrain and carved up landscapes We crave linkages and though we do not always pay attention to the in between these pathways these ways of earth shaping in Samson s words are key to understanding our relationship with the planet we call home An immense work of cultural geography touching on ecology sociology history and politics Earth Shapers argues that far from being constrained by geography we are instead its creators

Avian Ecology and Conservation in an Urbanizing World John M. Marzluff, Reed Bowman, Roarke Donnelly, 2012-12-06

One of the most striking and persistent ways humans dominate Earth is by changing land cover as we settle a region Much of our ecological understanding about this process comes from studies of birds yet the existing literature is scattered mostly decades old and rarely synthesized or standardized The twenty seven contributions authored by leaders in the fields of avian and urban ecology present a unique summary of current research on birds in settled environments ranging from wildlands to exurban rural to urban Ecologists land managers wildlife managers evolutionary ecologists urban planners landscape architects and conservation biologists will find our information useful because we address the conservation and evolutionary implications of urban life from an ecological and planning perspective Graduate students in these fields also will find the volume to be a useful summary and synthesis of current research extant literature and prescriptions for future work All interested in human driven land cover changes will benefit from a perusal of this book because we present high altitude photographs of each study area
