His natural bent had been from early youth to a consideration of Divine Mysteries. To learn these and teach them to others had been at all times his chief ambition. He is distinguished among the learned for his cultivation of Occult Philosophy, upon which he has written a complete work. The Philosophy of Natural Magic Henry Cornelius Agrippa von Nettesheim, 1913 **The Philosophy of Natural Magic** Heinrich Cornelius Agrippa von Nettesheim, 1913 **Frankenstein, Creation, and Monstrosity** Stephen Bann, 1994 Deals with the place of the monster in Western **Catalogue of the Public Library of the City of Detroit** Henry M. Crittenden, 2024-08-24 Reprint of the original first published in 1877 **Philosophy of Natural Magic** Heinrich Cornelius Agrippa von Nettesheim, 1991-09-01 **Religious Individualisation** Martin Fuchs, Antje Linkenbach, Martin Mulso, Bernd-Christian Otto, Rahul Björn Parson, Jörg Rüpke, 2019-12-16 This volume brings together key findings of the long-term research project *Religious Individualisation in Historical Perspective* Max Weber Centre for Advanced Cultural and Social Studies, Erfurt University. Combining a wide range of disciplinary approaches, methods, and theories, the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods, in particular in Asia, the Mediterranean, and Europe from antiquity to the recent past. Contrary to standard theories of modernisation, which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon, the chapters reveal processes of religious individualisation in a large variety of non-Western and pre-modern scenarios. Furthermore, the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency, the pluralisation of religious options, dynamics of de-traditionalisation and privatisation, the development of elaborated notions of the self, the facilitation of religious deviance, and on the notion of dividuality. Catalogue of Books in the Mercantile Library, of the City of New York Mercantile Library Association of the City of New-York, 1866 Walter Raleigh's History of the World and the Historical Culture of the Late Renaissance Nicholas Popper, 2012-11-02 Imprisoned in the Tower of London after the death of Queen Elizabeth in 1603, Sir Walter Raleigh spent seven years producing his massive

History of the World Created with the aid of a library of more than five hundred books that he was allowed to keep in his quarters this incredible work of English vernacular would become a best seller with nearly twenty editions abridgments and continuations issued in the years that followed Nicholas Popper uses Raleigh's History as a touchstone in this lively exploration of the culture of history writing and historical thinking in the late Renaissance From Popper we learn why early modern Europeans ascribed heightened value to the study of the past and how scholars and statesmen began to see historical expertise as not just a foundation for political practice and theory but as a means of advancing their power in the courts and councils of contemporary Europe The rise of historical scholarship during this period encouraged the circulation of its methods to other disciplines transforming Europe's intellectual and political regimes More than a mere study of Raleigh's History of the World Popper's book reveals how the methods that historians devised to illuminate the past structured the dynamics of early modernity in Europe and England *Francis Bacon on Motion and Power* Guido Giglioni, James A.T.

Lancaster, Sorana Corneanu, Dana Jalobeanu, 2016-04-25 This book offers a comprehensive and unitary study of the philosophy of Francis Bacon with special emphasis on the medical ethical and political aspects of his thought It presents an original interpretation focused on the material conditions of nature and human life In particular coverage in the book is organized around the unifying theme of Bacon's notion of appetite which is considered in its natural ethical medical and political meanings The book redefines the notions of experience and experiment in Bacon's philosophy of nature shows the important presence of Stoic themes in his work as well as provides an original discussion of the relationships between natural magic prudence and political realism in his philosophy Bringing together scholarly expertise from the history of philosophy the history of science and the history of literature this book presents readers with a rich and diverse contextualization of Bacon's philosophy **God and Nature in the Thought of Margaret Cavendish** Brandie R.

Siegfried, Lisa T. Sarasohn, 2016-04-22 Only recently have scholars begun to note Margaret Cavendish's references to God spirits and the rational soul and little has been published in this regard This volume addresses that scarcity by taking up the theological threads woven into Cavendish's ideas about nature matter magic governance and social relations with special attention given to Cavendish's literary and philosophical works Reflecting the lively state of Cavendish studies *God and Nature in the Thought of Margaret Cavendish* allows for disagreements among the contributing authors whose readings of Cavendish sometimes vary in significant ways and it encourages further exploration of the theological elements evident in her literary and philosophical works Despite the diversity of thought developed here several significant points of convergence establish a foundation for future work on Cavendish's vision of nature philosophy and God The chapters collected here enhance our understanding of the intriguing and sometimes brilliant contributions Cavendish made to debates about God's place in the scientific cosmos *Thinking with Demons* Stuart Clark, 1999 This is a work of fundamental importance for our understanding of the intellectual and cultural history of early modern Europe Stuart Clark offers a new interpretation of the

witchcraft beliefs of European intellectuals based on their publications in the field of demonology and shows how these beliefs fitted rationally with many other views current in Europe between the fifteenth and eighteenth centuries Professor Clark is the first to explore the appeal of demonology to early modern intellectuals by looking at the books they published on the subject during this period After examining the linguistic foundations of their writings the author shows how the writers ideas about witchcraft and about magic complemented their other intellectual commitments in particular their conceptions of nature history religion and politics The result is much more than a history of demonology It is a survey of wider intellectual and ideological purposes and underlines just how far the nature of rationality is dependent on its historical context

**Magical Epistemologies** Anannya Dasgupta, 2021-07-22 This book began with a simple question when readers such as us encounter the term magic or figures of magicians in early modern texts dramatic or otherwise how do we read them In the twenty first century we have recourse to an array of genres and vocabulary from magical realism to fantasy fiction that does not however work to read a historical figure like John Dee or a fictional one he inspired in Shakespeare s Prospero Between longings to transcend human limitation and the actual work of producing translating and organizing knowledge figures such as Dee invite us to re examine our ways of reading magic only as metaphor If not metaphor then what else As we parse the term magic it reveals a rich context of use that connects various aspects of social cultural religious economic legal and medical lives of the early moderns Magic makes its presence felt not only as a forms of knowledge but in methods of knowing in the Renaissance The arc of dramatists and texts that this book draws between Doctor Faustus The Tempest The Alchemist and Comus A Masque at Ludlow Castle offers a sustained examination of the epistemologies of magic in the context of early modern knowledge formation Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

**Disenchanted Albert the Great** David J. Collins, S. J., 2024-07-14 Albert the Great 1200 1280 was a prominent Dominican friar a leading philosopher and the teacher of Thomas Aquinas He also endorsed the use of magic Controversial though that stance would have been Albert was never punished or repudiated for what he wrote Albert s reception followed instead a markedly different course leading ultimately to his canonization by the Catholic Church in 1931 But his thoughts about magic have been debated for centuries Disenchanted Albert the Great takes Albert s contested reputation as a case study for the long and complex history surrounding the concept of magic and magic s relationship to science and religion Over the centuries Albert was celebrated for his magic or it was explained away but he was never condemned In the fifteenth century members of learned circles first attempted to distance Albert from magic with the goal of exonerating him of superstition irrationality and immorality Disenchanted Albert the Great discusses the philosopher s own understanding of magic an early adulatory phase of his reputation as a magician and the three primary strategies used to exonerate Albert over the centuries In the end Disenchanted Albert the Great tells the story of a thirteenth century scholar who worked to disenchant the natural world with his ideas about magic but who himself would not

be disenchanted until the modern era This accessible and insightful history will appeal to those interested in Albert the Great Catholic Church history the history of magic and Western understandings of the natural and the rational over time *Magic and Magicians in the Middle Ages and the Early Modern Time* Albrecht Classen, 2017-10-23 There are no clear demarcation lines between magic astrology necromancy medicine and even sciences in the pre modern world Under the umbrella term magic the contributors to this volume examine a wide range of texts both literary and religious both medical and philosophical in which the topic is discussed from many different perspectives The fundamental concerns address issue such as how people perceived magic whether they accepted it and utilized it for their own purposes and what impact magic might have had on the mental structures of that time While some papers examine the specific appearance of magicians in literary texts others analyze the practical application of magic in medical contexts In addition this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained Magic is oddly but significantly still around us and exerts its influence Focusing on magic in the medieval world thus helps us to shed light on human culture at large *Knowledge is Power (Icon Science)* John Henry, 2017-11-02 Francis Bacon a leading figure in the history of science never made a major discovery provided a lasting explanation of any physical phenomena or revealed any hidden laws of nature How then can he rank as he does alongside Newton Bacon was the first major thinker to describe how science should be done and to explain why Scientific knowledge should not be gathered for its own sake but for practical benefit to mankind And Bacon promoted experimentation coming to outline and define the rigorous procedures of the scientific method that today from the very bedrock of modern scientific progress John Henry gives a dramatic account of the background to Bacon s innovations and the sometimes unconventional sources for his ideas Why was he so concerned to revolutionize the attitude to scientific knowledge and why do his ideas for reform still resonate today *Of the Advancement of Learning* Francis Bacon, 1915
