Towards a neuroscience of social interaction Ulrich Pfeiffer,Bert Timmermans,Kai Vogeley,Chris Frith,Leonhard Schilbach, The burgeoning field of social neuroscience has begun to illuminate the complex biological bases of human social cognitive abilities However in spite of being based on the premise of investigating the neural bases of interacting minds the

majority of studies have focused on studying brains in isolation using paradigms that investigate offline social cognition i.e. social cognition from a detached observer's point of view asking study participants to read out the mental states of others without being engaged in interaction with them. Consequently the neural correlates of real time social interaction have remained elusive and may paradoxically represent the dark matter of social neuroscience. More recently a growing number of researchers have begun to study online social cognition i.e. social cognition from a participant's point of view based on the assumption that there is something fundamentally different when we are actively engaged with others in real time social interaction as compared to when we merely observe them. Whereas for offline social cognition interaction and feedback are merely a way of gathering data about the other person that feeds into processing algorithms inside the agent it has been proposed that in online social cognition the knowledge of the other at least in part resides in the interaction dynamics between the agents. Furthermore being a participant in an ongoing interaction may entail a commitment toward being responsive created by important differences in the motivational foundations of online and offline social cognition. In order to promote the development of the neuroscientific investigation of online social cognition this Frontiers Research Topic aims at bringing together contributions from researchers in social neuroscience and related fields whose work involves the study of at least two individuals and sometimes two brains rather than single individuals and brains responding to a social context. Specifically this Research Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the putative differences in the recruitment of underlying processes and mechanisms. Here an important focal point will be to address the various roles of social interaction in contributing to and at times constituting our awareness of other minds. For this Research Topic we therefore solicit reviews, original research articles, opinion and method papers which address the investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so. While focusing on work in the neurosciences this Research Topic also welcomes contributions in the form of behavioral studies, psychophysiological investigations, methodological innovations, computational approaches, developmental and patient studies. By focusing on cutting edge research in social neuroscience and related fields this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social.

Communication in Theatre Directing and Performance , Applications of Flow in Human Development and Education Mihaly Csikszentmihalyi, 2014-08-08 The third volume of the collected works of Mihaly Csikszentmihalyi covers his work on the application of flow in areas that go beyond the field of leisure where the concept was first applied. Based on his personal experience with schooling and learning as well as that of many others and contrary to what Cicero claimed Csikszentmihalyi arrived at the conclusion that instead of taking pride in making the roots of knowledge as bitter as possible we should try to make them sweeter. Just as flow became a popular and useful concept in voluntary activities it could likewise be applied in education with the end result of young people being more likely to continue

learning not just because they have to but because they want to This volume brings together a number of articles in which Csikszentmihalyi develops ideas about how to make education and more generally the process of learning to live a good life more enjoyable Since theory is the mother of good practice the first eleven chapters are devoted to theoretical reflections Some are general and explore what it means to be a human being what it means to be a person when we look at life from the perspective of flow Others are more narrowly focused on such topics as consumption education teaching and learning They help laypeople reflect how they can arrange their lives in such a way as to leave a small ecological footprint while getting the most enjoyment The second section of the volume contains a dozen empirical articles on similar topics They deal with the development of identity and self worth with the formation of goals and motivation with loneliness and family life

Menstrual Health in Women's Lives Alice J. Dan, Linda L. Lewis, 1992 Frau Psychologie The Palgrave Handbook of Social Creativity Research Izabela Lebeda, Vlad Petre Glăveanu, 2018-10-30 This Handbook brings together an international cast of experts to explore the social nature and context of creativity studies focusing on methodology as a key component in advancing the social study of creativity Two decades on from the pioneering work of Alfonso Montuori and Ronald E Purser the authors present a timely appraisal of past and present work in social creativity studies and look ahead to future developments within this field The authors collectively offer a rigorous examination of the methodological and empirical issues and techniques involved in studying social creativity They examine the phenomenon as a form of communication and interaction within collaborative relationships contending that creativity happens not within a vacuum but instead from a nexus of personal social and contextual influences This comprehensive work is organized in three parts focusing first on the various methodological approaches applicable to the social in creativity studies It secondly turns to empirical findings and approaches relating to the social nature of creativity In the book's final part the authors offer reflections on the state of social research into creativity pinpointing areas requiring further methodological scrutiny and empirical verification and areas that may inspire further theoretical or applied work Combining classic ideas with cutting edge emerging methods this work provides a vital methodological toolbox for investigators within social creativity
