CRITICAL REFLECTIONS OF

NATURALISM AND PRAGMATISM SCHOOL OF THOUGHT ON PRESENT EDUCATION SCENARIO Dr. Jugnu Khatter Bhatia,2020-10-08 1 1 Introduction The modern world mainly dominated by rapid growth of science and technological innovations is no doubt moving towards material world Technological developments and innovations have made human life materialistic mechanical conditioned and controlled Therefore a constructivist and progressive approach with broaden horizon may be the only remedy to uplift mankind from its present situation Education is the only way and means to relate to the whole world to experience to understand and attempt to change the perceptions of the world Education works as the spinal cord for the development of a nation A nation can be a developed one only if it has strong comprehensive and diversified education system Change is the law of nature and life In the same way education system changes with the passage of time as it is a dynamic concept In different periods it goes on changing on the foundation of circumstances of the country i e on the basis of educational views of eminent personalities and educationists as well as the recommendations given by various education commissions and committees 1 1 Bhatnagar Suresh Saxena Anamika 2006 Development of Education in India Meerut R Lall Book Depot **Medical Arena** ,1900 Doing what Scientists Do Ellen Doris,1991 Teachers and administrators wanting to make elementary science programs work will find out how in these pages This book translates the theory of discovery science into a method that teachers can use It shows how to begin and how to keep going how to organize space and materials how to manage the classroom in a way that encourages focus and interest how to inspire curiosity and help satisfy it Rich with examples of children s work and classroom dialogue this is a practical book meant to help teachers implement its ideas **Peabody Journal of Education** ,1927 Teaching Children Science Sally Gregory Kohlstedt,2010-05-15 In the early twentieth century a curriculum known as nature study flourished in major city school systems streetcar suburbs small towns and even rural one room schools This object based approach to learning about the natural world marked the first systematic attempt to introduce science into elementary education and it came at a time when institutions such as zoos botanical gardens natural history museums and national parks were promoting the idea that direct knowledge of nature would benefit an increasingly urban and industrial nation The definitive history of this once pervasive

nature study movement Teaching Children Science emphasizes the scientific pedagogical and social incentives that encouraged primarily women teachers to explore nature in and beyond their classrooms Sally Gregory Kohlstedt brings to vivid life the instructors and reformers who advanced nature study through on campus schools summer programs textbooks and public speaking Within a generation this highly successful hands on approach migrated beyond public schools into summer camps afterschool activities and the scouting movement Although the rich diversity of nature study classes eventually lost ground to increasingly standardized curricula Kohlstedt locates its legacy in the living plants and animals in classrooms and environmental field trips that remain central parts of science education today
