Nature, Culture, and Big Old Trees Kit Anderson,2010-06-04 Big old trees inspire our respect and even affection The poet Walt Whitman celebrated a Louisiana live oak that was solitary in a wide flat space Uttering joyous leaves all its life without a friend a lover near Groves and alleys of live oaks remain as distinctive landscape features on Louisiana s antebellum plantations while massive individuals still cast their shade over churches graveyards parks and roads Cajuns have adopted the Evangeline Oak as one of their symbols And the attachment that Louisianians feel for live oaks is equaled by that of Guatemalans for ceibas the national tree of Guatemala Long before Europeans came to the Americas the ceiba tallest of all native species was the Mayan world tree the center of the universe Today many ceibas remain as centers of Guatemalan towns spreading their branches over the central plaza and marketplace In this compelling book Kit Anderson creates a vibrant portrait of the relationship between people and trees in Louisiana and Guatemala Traveling in both regions she examined and photographed many old live oaks and ceibas and collected the stories and symbolism that have grown up around them She describes who planted the trees and why how the trees have survived through many human generations and the rich meanings they hold for people today Anderson also recounts the natural history of live oaks and ceibas to show what human use of the landscape has meant for the trees This broad perspective blending cultural geography and natural history adds a new dimension to our understanding of how big old trees and the places they help create become deeply meaningful even sacred for human beings

The Social Life of Trees Laura Rival,2021-03-10 The passionate response of the British public to the Newbury Bypass is a revealing measure of how strongly people feel about trees and the environment Similarly in the United States the giant sequoia of California is an enduring national symbol that inspires intense feelings As rainforests are sacrificed to the interests of multi national corporations and traditional ways of life disappear the status of forests the cultural significance of trees and the impact of conservation policies are subjects that have inspired intense engagement Why do people feel so strongly about trees With this explosion of interest in environmental issues a serious study of what trees mean to people has long been overdue This interdisciplinary book responds to this need by providing the first cross cultural analysis of tree symbolism Drawing on rich case studies contributors explore the processes through which trees are used as metaphors of identity and continuity Political struggles over forest resources feature prominently and the perceptions of trees in various cultures provide telling insights into the ways in which human societies conceptualize nature As well as being a major

Chinese Environmental Ethics Mayfair Yang, 2021-11-08 An interdisciplinary collection in the new field of environmental humanities this volume brings together Chinese environmental ethics religious ontology and religious practice to explore how traditional Chinese religious environmental ethics are actually put into social practice both in China's past and present. It also examines how Chinese religious teachings offer a wealth of resources to the environmental project of forging new ontologies for humans co-existing with other living beings. Different chapters examine how Buddhist ontology avoids anthropocentrism fengshui Chinese geomancy can help protect the landscape from economic development popular religion organizes tree planting ancient dream interpretation practices avoided constructing the possessive individual subjectivity of modern consumerism Buddhist rituals and ethics promoted compassion for animals and modern recycling Confucian ancestor rituals and tombs have deterred industrial expansion and also how Daoism's potential role to deter desertification in northern China was stymied by state operations in contemporary China. A significant advance in the field of Chinese environmental anthropology the outstanding scholars in this volume provide a unique and much needed contribution to the scholarship on China and the environment.

Shifting Cultivation and Environmental Change Malcolm F. Cairns, 2015-01-09 Shifting cultivation is one of the oldest forms of subsistence agriculture and is still practised by millions of poor people in the tropics. Typically it involves clearing land often forest for the growing of crops for a few years and then moving on to new sites leaving the earlier ground fallow to regain its soil fertility. This book brings together the best of science and farmer experimentation vividly illustrating the enormous diversity of shifting cultivation systems as well as the power of human ingenuity. Some critics have tended to disparage shifting cultivation sometimes called swidden cultivation or slash and burn agriculture as unsustainable due to its supposed role in deforestation and land degradation. However the book shows that such indigenous practices as they have evolved over time can be highly adaptive to land and ecology. In contrast scientific agricultural solutions imposed from outside can be far more damaging to the environment and local communities. The book focuses on successful agricultural strategies of upland farmers particularly in south and south east Asia and presents over 50 contributions by scholars from around the world and from various disciplines including agricultural economics ecology and anthropology. It is a sequel to the much praised *Voices from the Forest Integrating Indigenous Knowledge into Sustainable Upland Farming* RFF Press 2007 but all chapters are completely new and there is a greater emphasis on the contemporary challenges of climate change and biodiversity conservation.

Trekking Through

History Laura M. Rival, 2002-06-01 The Huaorani of Ecuador lived as hunters and gatherers in the Amazonian rainforest for hundred of years largely undisturbed by western civilization Since their first encounter with North American missionaries in 1956 they have held a special place in journalistic and popular imagination as Ecuador's last savages *Trekking Through History* is the first description of Huaorani society and culture according to modern standards of ethnographic writing Through her comprehensive study of their extraordinary tradition of trekking Laura Rival shows that the Huaorani cannot be seen merely as anachronistic survivors of the Spanish Conquest Her critical reappraisal of the notions of agricultural regression and cultural devolution challenges the universal application of the thesis that marginal tribes of the Amazon Basin represent devolved populations who have lost their knowledge of agriculture Far from being an evolutionary event trekking expresses cultural creativity and political agency Through her detailed comparative discussion of native Amazonian representations of history and the environment Rival illustrates the unique way the Huaorani have socialized nature by choosing to depend on resources created in the past highlighting the unique contribution anthropology makes to the study of environmental history

Historical Dictionary of Nepal Nanda R. Shrestha, Keshav Bhattarai, 2017-02-08 Nepal is a living example of contrasts and contradictions It is a country that was born in medieval times grew up in the 16th century and now finds itself engulfed in the high tech gadgets and material marvels of the 21st century Nepal has its share of problem which include inadequate economic development and social infrastructure poverty and corruption plus worsening pollution but now it finally has relative peace and quiet after a hasty Maoist uprising Indeed it has passed through several democratic elections and finally seems to be getting on the right track This second edition of *Historical Dictionary of Nepal* contains a chronology an introduction appendixes and an extensive bibliography The dictionary section has over 700 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Nepal

Second Growth Robin L. Chazdon, 2014-05-23 For decades conservation and research initiatives in tropical forests have focused almost exclusively on old growth forests because scientists believed that these pristine ecosystems housed superior levels of biodiversity With *Second Growth* Robin L. Chazdon reveals those assumptions to be largely false bringing to the fore the previously overlooked counterpart to old growth forest second growth Even as human activities result in extensive fragmentation and deforestation tropical forests demonstrate a great capacity for natural and human aided regeneration Although these damaged landscapes can take centuries to regain the characteristics of old growth Chazdon shows here that regenerating or second growth forests are vital dynamic reservoirs of biodiversity and environmental services What is more they always have been With chapters on the roles these forests play in carbon and nutrient cycling sustaining biodiversity providing timber and non timber products and integrated agriculture *Second Growth* not only offers a thorough and wide ranging overview of successional and restoration pathways but also underscores the need to conserve and further study regenerating tropical forests in an attempt to inspire a

Sustainability examines today's environmental challenges in light of traditional knowledge linking insights from geography, population and environment from a wide range of regions around the globe. Organized in four parts, the book describes the foundations of human geography and its current research challenges, the intersections between environment and cultural diversity, addressing various types of ecosystem services and their interaction with the environment, the impacts of sustainability practices used by indigenous culture on the ecosystem, and conservation ecology and environment management. Using theoretical and applied insights from local communities around the world, this book helps geographers, demographers, environmentalists, economists, sociologists, and urban planners tackle today's environmental problems from new perspectives. Includes in-depth case studies across different geographic spaces. Contains contributions from a range of young to eminent scholars, researchers, and policymakers. Highlights new insights from social science, environmental science, and sustainable development. Synthesizes research on society, ecology, and technology with sustainability all in a single resource.
