The Nature of Learning Disabilities Kenneth A. Kavale, Steven R. Forness, 2012-12-06 The category of learning disabilities continues to be among the most contentious in special education Much of the debate and dissent emanates from a lack of understanding about its basic nature The failure to evolve a comprehensive and unified perspective about the nature of learning disabilities has resulted in the concept being lost The loss is best illustrated through the failure to answer this seemingly simple question What is a learning disability Using historical empirical theoretical conceptual and philosophical analyses this volume explores a number of problems and issues facing the field of learning disabilities The chapters cover historical influences definitional problems primary characteristics assessment practices theoretical development major themes research and measurement models and long term outcomes The goal is to explicate the nature of learning disabilities by analyzing what it was supposed to be what it has become and what it might be A predominant theme running through this text is the necessity for the field of learning disabilities to regain integrity by recapturing its essence

David Kember, 2015-11-17 This book is based upon three interrelated open naturalistic studies conducted to better characterise the motivational orientation of students in higher education Open semi structured individual interviews were conducted with undergraduates students at community colleges and students in taught postgraduate courses in Hong Kong The analysis used an exploratory grounded theory approach and resulted in a motivational orientation framework with six continua with positive and negative poles On enrolment students had positions on the six facets of motivation which shifted as they progressed through their degree according to their perceptions of the teaching and learning environment The framework can therefore be used to explain both initial decisions to enrol and motivation to continue studying The interviews included descriptions of teaching approaches and learning activities and their effects on motivation This made it possible to

describe a teaching and learning environment conducive to motivation with eight supportive conditions Each facet of the teaching and learning environment is illustrated with quotations from the three groups of students resulting in a guide to configuring a teaching and learning environment conducive to motivating students The emerging community college sector in Hong Kong is used as a case study of the effects on student motivation of the expansion of the higher education sector through private colleges Cultural issues are discussed particularly the performance of Asian students relative to those in the West
