The Nature of Sleep Gordon Ethelbert Ward Wolstenholme,1961 **The Nature of Sleep** ,1961 *Ciba Foundation Symposium on the Nature of Sleep* Gordon Ethelbert Ward Wolstenholme,Maeve O'Connor,1961 **The Dream and Human Societies** G. E. Von Grunebaum,Roger Caillois,2023-07-28 The study of dreams and their role in human societies particularly within classical Islam provides a fascinating lens through which to understand both individual and collective psychology In medieval Islamic culture dreams were seen not only as personal experiences but as profound communications from the divine or supernatural This belief system imbued the dream with cognitive power often interpreting dreams as forms of prophecy or divine messages a view that transcended the individual s inner psyche and extended into the realm of objective truth Dreams were considered a bridge to understanding the future the Hereafter and the will of God with scholars like Abdalghani an N bulus developing elaborate systems for interpreting their meanings These interpretations drew heavily from religious texts such as the Koran and Hadith and offered guidance on a variety of matters ranging from personal conduct to political affairs The significance of dreams within classical Islam is also evident in their societal and political implications Dreams were not only seen as personal revelations but also as instruments of prophecy often used to predict the death of rulers the success of military campaigns or the outcomes of political struggles They were deeply intertwined with religious doctrines with the Prophet Muhammad and various saints appearing in dreams to guide or advise key figures in Islamic history These dream visions were viewed as essential tools for navigating both the personal and political spheres reinforcing the belief that the dream world was closely linked with the divine order The widespread acceptance of dreams as a form of truth is a striking contrast to contemporary Western thought where dreams are more commonly seen as reflections of the subconscious mind In this sense the historical and cultural context of classical Islam elevated the dream to a status that intertwined it with both personal and societal identity suggesting a powerful intersection of religion politics and individual experience This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist

dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966 *Natural Mammalian Hibernation* William V. Mayer, Ormond G. Mitchell, Edward T. Roche, 1964 The bibliography consists of over 2 100 references directly impinging upon natural mammalian hibernation including a few references to birds and potential hibernators A cross referenced subject matter index makes it possible to locate with relative ease articles dealing with specific features of hibernation The material was assembled over a number of years by detailed examination of library holdings review literature abstracting journals The Zoological Record B A S I C and individual journals and with the cooperation of fellow researchers in the field of natural mammalian hibernation The assembled references were checked for their applicability for inclusion in this bibliography alphabetized by author and numbered for cross reference indexing The parameters of the initial charge for making this bibliography have eliminated references to poikilothermous animals and most references to hypothermia and have been the guidelines used to reduce some 7 000 references to the approximately one third which finally comprise this bibliography

Brain and Conscious Experience John C. Eccles, 2012-12-06 The planning of this Study Week at the Pontifical Academy of Science from September 28 to October 4 1964 began just two years before when the President Professor Lemaitre asked me if I would be responsible for a Study Week relating Psychology to what we may call the Neurosciences I accepted this responsibility on the understanding that I could have assistance from two colleagues in the Academy Professors Heymans and Chagas Besides participating in the Study Week they gave me much needed assistance and advice in the arduous and at times perplexing task that I had undertaken and I gratefully acknowledge my indebtedness to them Though there have been in recent years many symposia concerned with the so called higher functions of the brain for example with perception learning and conditioning and with the processing of information in the brain there has to my knowledge been no symposium specifically with brain functions and consciousness since the memorable treating Laurentian Conference of 1953 which was later published in 1954 as the book *Brain Mechanisms and Consciousness* William James Bruce Wilshire, 1984-06-30 The importance of this collection of writings of William James lies in the fact that it has been arranged to provide a systematic introduction to his major philosophical discoveries and precisely to those doctrines and theories that are of most burning current interest William James *The Essential Writings* is a series of philosophical arguments on some of the most obscure and head cracking problems in contemporary philosophy the relation of thought to its object the interrelationships between meaning and truth the levels and structures of experience the degrees of reality the nature of the embodied self the relation of ethics aesthetics and religious experience to man's strenuously and heroically active nature and above all the structurization of the experienced life world as the validating ground and origin of all theory Bruce Wilshire has provided an introduction to William James's thought on these and other related points which is at once both substantial and subtle

The Neurosciences: Paths of Discovery, I F. WORDEN,J. SWAZEY,G. ADELMAN,2012-12-06 To commemorate properly the 70th birthday of a man who by his very nature is too busy to pause for any kind of ceremonial event unless it has a concomitant functional output was a difficult problem for the Staff and Associates of the Neurosciences Research Program Frank F O S has always dreaded the prospect that sometime it might be appropriate for his colleagues to present him a Fest schrift In fact Fest me no Schriften became his battle cry expressing his feeling that the idea of testimonials clustered into a book was anathema So the break through idea for the planners was to organize a symposium around the theme of discovery in neuroscience that would be valuable scientifically and in its demonstration of interdisciplinary interaction would support that emphasis in Frank s career After much planning a program was developed beginning with a birthday party the evening before followed by the two day symposium and closing with the first F O Schmitt Lecture in Neuroscience We hope that publication of the scientific proceedings in this volume will be of interest not only to the neuroscience community but also to a broad general readership interested in discovery understanding and the creative processes in scientific work An organizing committee chaired by Fred Worden collected advice and guidance leading to the selection of speakers whose scientific careers have played an important part in the recent history of modern neuroscience
