the natural areas as possible from being lost to the relentless march of development encroachments and other human activities There are lessons in the highest levels of conservation leadership without hiding the soft belly of the onerous tasks There is narrative of large predators in trouble leopards and tigers of the local extinction of the large hearted gentleman the tiger so christened by the redoubtable Jim Corbett in Panna Tiger Reserve a decade ago and the tiger s remarkable resurrection in the very same area Of daring experiments investigations innovations and establishment of field based skills all carried to their logical conclusion success The reader is placed right in the middle of the action What is more there is no hiding of problems and some failures

*Living Beings* Penelope Dransart,2020-06-03 *Living Beings* examines the vital characteristics of social interactions between living beings including humans other animals and trees Many discussions of such relationships highlight the exceptional qualities of the human members of the category insisting for instance on their religious beliefs or creativity In contrast the international case studies in this volume dissect views based on hierarchical oppositions between human and other living beings Although human practices may sometimes appear to exist in a realm beyond nature they are nevertheless subject to the pull of natural forces These forces may be brought into prominence through a consideration of the interactions between human beings and other inhabitants of the natural world The interplay in this book between social anthropologists philosophers and artists cuts across species divisions to examine the experiential dimensions of interspecies engagements In ethnographically and or historically contextualized chapters contributors examine the juxtaposition of human and other living beings in the light of themes such as wildlife safaris violence difference mimicry simulation spiritual renewal dress and language

Marwah,Swaran Singh,2023-01-19 The year 2020 was a watershed event in the history of climate change politics It marked the end of the second commitment period of the Kyoto Protocol and the beginning of the ambitious Paris Agreement It was also the year of the pandemic where the disruption caused severe implications on a global scale The pandemic also brought before the world the severity and scale of the transboundary challenges in a globally interconnected world It exposed the weaknesses of the global institutions and governance structures in tackling the complex and imminent threat of climate change As states prepare for the future of global climate change negotiations post the COP26 event of 2021 there has been a significant shift in the politics of climate change at all levels The negotiations took place in the shadows of the pandemic which has challenged the political lethargy and non committal attitudes of states on the climate change question Unlike in the past climate change is now a hot issue on the political high tables It has also spilled outside these negotiating spaces and into the public sphere Whether it is the school strikes led by children or the indigenous struggles of marginalized populations the politics of climate change today is far more diverse representative and active At the same time we can witness the shifts in the state s understanding of the problem which is actively inquiring about its security and geopolitical dimensions The boundaries between traditional and non traditional threats to security are getting blurred as climate change and its myriad

impacts wreak havoc on ecosystem resilience the state's welfare capacity and people's everyday lives Hence this volume seeks to decipher the nature of global climate change politics in the post pandemic and climate insecure world Who will be its main actors main stakeholders and losers How will questions of equity sustainability and finance interplay at the COP26 event and thereafter How will developing and poor countries engage with the issue in the next phase of climate politics Finally how will the ambition of the Paris Agreement which is reflected in the language of net zero targets and the two degrees Celsius temperature goals be brought into action
