Pararealities: The Nature of Our Fictions and How We Know Them Floyd Merrell, 1983-01-01 The objective of this study is to inquire from a broad epistemological view into the underlying nature of fictions and above all to discover how it is possible to create and process them In Chapter One I

put forth four postulates in the form of thought experiments in Chapter Two I turn attention to make believe imaginary and dream worlds and how they can be conceived and perceived only with respect to the a real world Chapter Three includes a discussion of the affinities and differences between one's tacit knowledge of certain aspects of the number system in arithmetic an ordered series and the range of all possible fictional entities an unordered network In Chapter Four I establish more precisely the relations between one's real world and one's fictional worlds in light of the conclusions from Chapter Three And in Chapter Five I attempt to construct a formal model with which to account for the construction of all possible fictional sentences

The Nature of Learning George Humphrey, 2013-11-05 This is Volume IV in a series of twenty one in a collection on Cognitive Psychology Originally published in 1933 this looks at the nature of learning in its relation to the living system In order to discover the mechanism of the living system it is necessary to investigate which among its effects are connected with well established laws of chemistry and physics and to distinguish them carefully from the effects which have no immediate or at least known relation with these laws and of which the cause is

concealed for us *Read Me a Tree, Rhyme Me a Bee* Heather McNeil, 2025-07-10 Experts agree that it's essential for children to spend time exploring and enjoying the outdoors when they come back in. Librarians and teachers can supplement their adventures with nature storytimes. In this comprehensive book full of storytime plans, veteran children's librarian Heather McNeil recommends storytime books that encourage respect for nature and an understanding of the fragility of ecosystems. Each chapter includes crafts, games, songs, and rhymes that focus on learning about and appreciating nature. Some crafts use items from the outdoors; others represent nature's beauty or mystery. Storytime plans include all the components of a successful storytime: books, songs, movement, and creative participation. Librarians and early elementary teachers will enjoy using this book to support literacy and social-emotional goals while helping children develop an appreciation of the natural world.

Independent Thinking on Nature-Based Learning Alexia Barrable, 2022-09-30
Foreword by Ian Gilbert At a time of unprecedented challenges in relation not only to the climate crisis but also to children's and adolescents' mental health, connecting to nature offers an accessible and desirable way forward for today's learners, especially those living in urban surroundings. Bringing together evidence from psychology, environmental science, and education, Alexia aims to support teachers as they provide meaningful experiences rooted in learning about and through nature. The book can be used in two ways: to inspire individual sessions in nature or to support teachers in building a cohesive outdoor learning curriculum throughout the school. Featuring practical advice, case studies, and discussion of original theory, the book aims to inspire, motivate, and stimulate educators to engage with alternative approaches to teaching in the outdoors and with nature in mind, and in such a way that promotes students' learning and fosters a long-lasting relationship with nature. *Independent Thinking on Nature-Based Learning* shares case studies and examples of good practice from a variety of settings ranging from kindergarten to secondary. Detailing the physical and psychological benefits of being outdoors, the book suggests ways to help build young people's connection with nature and support their autonomy in natural spaces. Alexia offers ideas on how to weave nature and the outdoors into the very fabric of the curriculum, for example in relation to art, literature, and technology. Suitable for teachers and outdoor learning leaders in early years through to secondary schools, *Independent Thinking on Nature-Based Learning* is one of a number of books in the *Independent Thinking On* series from the award-winning Independent Thinking Press.
