Shopping All the Way to the Woods Rachel S. Gross, 2024-03-26 A fascinating history of the profitable paradox of the American outdoor experience visiting nature first requires shopping No escape to nature is complete without a trip to an outdoor recreational store or a browse through online offerings This is the irony of the American outdoor experience visiting wild spaces supposedly untouched by capitalism first requires shopping With consumers spending billions of dollars on clothing and equipment each year as they seek out nature the American outdoor sector grew over the past 150 years from a small collection of outfitters to an industry contributing more than 2 percent of the nation's economic output Rachel S Gross argues that this success was predicated not just on creating functional equipment but also on selling an authentic anticommercial outdoor identity In other words shopping for the woods was also about being or becoming the right kind of person Demonstrating that outdoor culture is commercial culture Gross examines Americans journey toward outdoor expertise by tracing the development of the nascent outdoor goods industry the influence of World War II on its growth and the boom years of outdoor businesses

The Maximum of Wilderness Kelly Enright, 2012-01-10 Danger in the Congo The unexplored Amazon Long perceived as a place of mystery and danger and more recently as a fragile system requiring our protection the tropical forest captivated America for over a century In The Maximum of Wilderness Kelly Enright traces the representation of tropical forests what Americans have typically thought of as jungles and their place in both our perception of wildness and the globalization of the environmental movement In the early twentieth century jungle adventure as depicted by countless books

and films from Burroughs's Tarzan novels to King Kong had enormous mass appeal. Concurrent with the proliferation of a popular image of the jungle that masked many of its truths was the work of American naturalists who sought to represent an authentic view of tropical nature through museums, zoological and botanical gardens, books, and film. Enright examines the relationship between popular and scientific representations of the forest through the lives and work of Martin and Osa Johnson, who with films such as *Congorilla* and *Simba* blended authenticity with adventure, as well as renowned naturalists John Muir, William Beebe, David Fairchild, and Richard Evans Schultes. The author goes on to explore a startling shift at midcentury in the perception of the tropical forest from the jungle, a place that endangers human life, to the rain forest, a place that is itself endangered.

Music and the Skillful Listener Denise Von Glahn, 2013-04-09 For Denise Von Glahn, listening is that special quality afforded women who have been fettered for generations by the maxim be seen and not heard. In *Music and the Skillful Listener*, Von Glahn explores the relationship between listening and musical composition, focusing on nine American women composers inspired by the sounds of the natural world: Amy Beach, Marion Bauer, Louise Talma, Pauline Oliveros, Joan Tower, Ellen Taaffe Zwilich, Victoria Bond, Libby Larsen, and Emily Doolittle. Von Glahn situates nature composing among the larger tradition of nature writing and argues that like their literary sisters, works of these women express deeply held spiritual and aesthetic beliefs about nature. Drawing on a wealth of archival and original source material, Von Glahn skillfully employs literary and gender studies, ecocriticism, and ecomusicology and the larger world of contemporary musicological thought to

tell the stories of nine women composers who seek to understand nature through music
