Navigation Lines of the United States, Porto Rico, Canada, Mexico and Cuba, 1911 *Reading Africa into American Literature* Keith Cartwright, 2021-12-14 The literature often considered the most American is rooted not only in European and Western culture but also in African and American Creole cultures Keith Cartwright places the literary texts of such noted authors as George Washington Cable W E B DuBois Alex Haley Zora Neale Hurston Ralph Ellison William Faulkner Joel Chandler Harris Herman Melville Toni Morrison and many others in the context of the history spiritual traditions folklore music linguistics and politics out of which they were written Cartwright grounds his study of American writings in texts from the Senegambian Old Mali region of Africa Reading epics fables and gothic tales from the crossroads of this region and the American South he reveals that America's foundational African presence along with a complex set of reactions to it is an integral but unacknowledged source of the national culture identity and literature [Time and Navigation](#) Andrew K.

Johnston, Roger D. Connor, Carlene E. Stephens, Paul E. Ceruzzi, 2015-06-02 If you want to know where you are you need a good clock The surprising connection between time and place is explored in Time and Navigation The Untold Story of Getting from Here to There the companion book to the National Air and Space Museum exhibition of the same name Today we use smartphones and GPS but navigating has not always been so easy The oldest clock is Earth itself and the oldest means of

keeping time came from observing changes in the sky Early mariners like the Vikings accomplished amazing feats of navigation without using clocks at all Pioneering seafarers in the Age of Exploration used dead reckoning and celestial navigation later innovations such as sextants and marine chronometers honed these techniques by measuring latitude and longitude When explorers turned their sights to the skies they built on what had been learned at sea For example Charles Lindbergh used a bubble sextant on his record breaking flights World War II led to the development of new flight technologies notably radio navigation since celestial navigation was not suited for all weather military operations These forms of navigation were extended and enhanced when explorers began guiding spacecraft into space and across the solar system Astronauts combined celestial navigation technology with radio transmissions The development of the atomic clock revolutionized space flight because it could measure billionths of a second thereby allowing mission teams to navigate more accurately Scientists and engineers applied these technologies to navigation on earth to develop space based time and navigation services such as GPS that is used every day by people from all walks of life While the history of navigation is one of constant change and innovation it is also one of remarkable continuity Time and Navigation tells the story of navigation to help us understand where we have been and how we got there so that we can understand where we are going

Transnational Law and State Transformation Jennifer Lander, 2019-11-07 This book contributes new theoretical insight and in depth empirical analysis about the relationship between transnational legality state change and the globalisation of markets The role of transnational economic law in influencing and reorganising national systems of governance evidences the constitutional dimensions of global capitalism the power to institute new rules and limits for national states This form of new constitutionalism does not undermine the state but transforms it by eroding national capacities and implanting global alternatives While leading scholars in the field have emphasised the much needed value of case studies there are no studies available which consider the cumulative impact of multiple axes of transnational legal ordering on the national state or its constitution This monograph addresses this empirical gap whilst expanding the theoretical scope of the field Mongolia s recent transformation as a mineral exporting country provides a rare opportunity to witness economic and legal globalisation in process Based on careful empirical analysis of national law and policy making the book traces the way distinctive processes of transnational legal ordering have reorganised and reframed the governance of Mongolia s mining sector specifically by redistributing state power in relation to the market sub national administrations and civil society The book investigates the role of international financial institutions multinational corporations and non governmental organisations in normative transmission as well as the critical role of national actors in embedding transnational investment norms within the domestic legal and policy environment As the book demonstrates however the constitutional ramifications of transnational legal ordering extend beyond the mining regime itself into more fundamental questions of the trajectory of state transformation institutionally and ideologically The book will be of interest to scholars of

international law global governance and the political economy of development Merchants' Second Edition of Mr.
