## **Points Of View:**

**Point of View in Plays** Dan McIntyre, 2006-01-01 This is the first book length study of how point of view is manifested linguistically in dramatic texts It examines such issues as how readers process the shifts in viewpoint that can occur within such texts Using insights from cognitive linguistics the book aims to explain how the analysis of point of view in drama can be undertaken and how this is fruitful for understanding textual and discursal effects in this genre Following on from a consideration of existing frameworks for the analysis of point of view a cognitive approach to deixis is suggested as being particularly profitable for explaining the viewpoint effects that can arise in dramatic texts To expand on the large number of examples discussed throughout the book the penultimate chapter consists of an extended analysis of a single play This book is relevant to scholars in a range of areas including linguistics literary studies and cognitive science

**Point of View and Grammar** Joanne Scheibman, 2002-01-01 This book proposes that subjective expression shapes grammatical and lexical patterning in American English conversation Analyses of structural and functional properties of English conversational utterances indicate that the most frequent combinations of subject tense and verb type are those that are used by speakers to personalize their contributions not to present unmediated descriptions of the world These findings are informed by current research and practices in linguistics which argue that the emergence or conventionalization of linguistic structure is related to the frequency with which speakers use expressions in discourse The use of conversational data in grammatical analysis illustrates the local and contingent nature of grammar in use and also raises theoretical questions concerning the coherence of linguistic categories the viability of maintaining a distinction between semantic and pragmatic meaning in analytical practice and the structural and social interplay of speaker point of view and participant interaction in discourse

**Poetics of Composition** Boris Andreevich Uspenskii, 1973

**The Variety of Values** Susan R. Wolf, 2015 For over thirty years Susan Wolf has been writing about moral and nonmoral values and the relation between them This volume collects Wolf's most important essays on the topics of morality love and meaning ranging from her classic essay Moral Saints to her most recent The Importance of Love Wolf's essays warn us against the common tendency to classify values in terms of a dichotomy that contrasts the personal self interested or egoistic with the impersonal altruistic or moral On Wolf's view this tendency ignores or distorts the significance of such values as love beauty and truth and neglects the importance of meaningfulness as a dimension of the good life These essays show us how a self conscious recognition of the variety of values leads to new understandings of the point the content and the limits of morality and to new ways of thinking about happiness and well being

**How Does it Feel?** Charlotte Bosseaux, 2007 Narratology is concerned with the study of narratives but surprisingly it does not usually distinguish between original and translated texts This lack of distinction is regrettable In recent years the visibility of translations and translators has become a widely discussed topic in Translation Studies yet the issue of translating a novel's point of view has remained relatively unexplored It seems crucial to ask how far a translator's

choices affect the novel's point of view and whether characters or narrators come across similarly in originals and translations This book addresses exactly these questions It proposes a method by which it becomes possible to investigate how the point of view of a work of fiction is created in an original and adapted in translation It shows that there are potential problems involved in the translation of linguistic features that constitute point of view and that this has an impact on the way works are translated

**Marx's Theory of Ideology (RLE Marxism)** Bhikhu Parekh, 2015-04-17 Although Marx's concept of ideology has been a subject of considerable discussion much of the debate has proved to be rather disappointing There has been no systematic attempt to examine why Marx needed the concept of ideology why it was an important concept for him and how it related to his views on truth and objectivity This book first published in 1982 considers these and other neglected questions It explains why Marx continued to use the term ideology throughout his life to mean both idealism and apologia and traces the complex ways in which according to Marx such talented writers as Hegel became apologists In conclusion the book outlines the lessons Marx learnt from his investigations into the nature and mechanism of ideology and discusses his theories of objectivity and truth

English Teaching Forum, 2003

*Self and Affect* Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness
