Hutchison,2024-06-04 A sharp fiercely argued takedown of neoliberalism that not only defines this slippery concept but connects it to the climate crisis poverty and fascism and shows us how to fight back Neoliberalism is the dominant ideology of our time It shapes us in countless ways yet most of us struggle to articulate what it is Worse we have been persuaded to accept this extreme creed as a kind of natural law In Invisible Doctrine journalist George Monbiot and filmmaker Peter Hutchison shatter this myth They show how a fringe philosophy in the 1930s championing competition as the defining feature of humankind was systematically hijacked by a group of wealthy elites determined to guard their fortunes and power Think tanks corporations the media university departments and politicians were all deployed to promote the idea that people are consumers rather than citizens One of the most pernicious effects has been to make our various crises from climate disasters to economic crashes from the degradation of public services to rampant child poverty seem unrelated In fact they have all been exacerbated by the invisible doctrine which subordinates democracy to the power of money Monbiot and Hutchison connect the dots and trace a direct line from neoliberalism to fascism which preys on people s hopelessness and desperation Speaking out against the fairy tale of capitalism and populist conspiracy theories Monbiot and Hutchison lay the groundwork for a new politics one based on truly participatory democracy and private sufficiency public luxury an inspiring vision that could help bring the neoliberal era to an end

**From Primitive to Postcolonial in Melanesia and Anthropology** Bruce Knaft,2025-10-01 What have anthropologists taught us about Melanesia one of anthropology s most important and intensively studied world regions In this book Professor Bruce Knaft draws together and critically reanalyzes what we know about major features of Melanesian cultural history warfare and politics gender bodily practices and spirituality as discerned from more than a century of academic study From Primitive to Postcolonial in Melanesia and Anthropology is arguably the

most comprehensive single reassessment of Melanesia as an ethnographic world area to have been published in several decades. Written for students as well as professional scholars, this work further broadens our understanding by analyzing the history of Melanesian ethnography and relating this history to the larger relationship between Melanesia as a contemporary world area and anthropology as a field of contemporary human study. Bruce M. Knauff is Professor of Anthropology, Emory University, and the author of three previous books as well as some thirty journal articles and chapters. Knauff's interests span a wide range of issues in the anthropology of Melanesia, and he is articulate with general issues of cultural theory and anthropological history.

In the Shadow of the Palms Sophie Chao, 2022-05-02. With *In the Shadow of the Palms*, Sophie Chao examines the multispecies entanglements of oil palm plantations in West Papua, Indonesia, showing how Indigenous Marind communities understand and navigate the social, political, and environmental demands of the oil palm plant. As Chao notes, it is no secret that the palm oil sector has destructive environmental impacts; it greatly contributes to tropical deforestation and is a major driver of global warming. Situating the plant and the transformations it has brought within the context of West Papua's volatile history of colonization, ethnic domination, and capitalist incursion, Chao traces how Marind attribute environmental destruction not just to human technologies and capitalism but also to the volition and actions of the oil palm plant itself. By approaching cash crops as both drivers of destruction and subjects of human exploitation, Chao rethinks capitalist violence as a multispecies act. In the process, Chao centers how Marind fashion their own changing worlds and foreground Indigenous creativity and decolonial approaches to anthropology. **Inside Indonesia**, 2004      **The Earthscan Action Handbook for People and Planet** Miles Litvinoff, 2013-11-05. We have poisoned the air and water on which our lives depend. Poor countries exhaust their land in the struggle to survive while rich countries demand more and more. *The Earthscan Action Handbook* spells out why things have gone so terribly wrong and what each of us can do to clean up the mess. Each chapter deals with one of the major problems people and the planet now face: meeting the human needs of health, education, and social justice, as well as the environmental needs of our dying lakes and forests, polluted seas, threatened habitats, and endangered species. Packed with suggestions for positive action, this book also gives details of who to contact, what to read, and where to go if you want to do more. Whether you care about buying safe food or feeding the world, *The Earthscan Action Handbook* is indispensable. Originally published in 1990.

*South Coast New Guinea Cultures* Bruce M. Knauff, 1993-03-25. The communities of south coast New Guinea were the subject of classic ethnographies, and fresh studies in recent decades have put these rich and complex cultures at the centre of anthropological debates. Flamboyant sexual practices such as ritual homosexuality have attracted particular interest. In the first general book on the region, Dr Knauff reaches striking new comparative conclusions through a careful ethnographic analysis of sexuality, the status of women, ritual, and cosmology, political economy, and violence among the region's seven major language culture areas. The findings suggest new Melanesian regional contrasts and provide

for a general critique of the way regional comparisons are constructed in anthropology Theories of practice and political economy as well as post modern insights are drawn upon to provide a generative theory of indigenous social and symbolic development

**Genealogies for the Present in Cultural Anthropology** Bruce M. Knaft, 2013-09-13 In the wake of tensions between modern and postmodern sensibilities what larger directions now emerge in cultural anthropology In this major work Bruce Knaft takes stock of important recent initiatives in cultural and critical theory By combining critical reviews and ethnographic engagements with fresh readings of major figures and approaches the work develops a larger vantage point for considering the dispersing influence of practice theories postmodernism cultural studies postcolonial studies modern post positive feminism and multicultural criticisms

*Nomadic Peoples and Human Rights* Jérémie Gilbert, 2014-03-26 Although nomadic peoples are scattered worldwide and have highly heterogeneous lifestyles they face similar threats to their mobile livelihood and survival Commonly nomadic peoples are facing pressure from the predominant sedentary world over mobility land rights water resources access to natural resources and migration routes Adding to these traditional problems rapid growth in the extractive industry and the need for the exploitation of the natural resources are putting new strains on nomadic lifestyles This book provides an innovative rights based approach to the issue of nomadism looking at issues including discrimination persecution freedom of movement land rights cultural and political rights and effective management of natural resources Jeremie Gilbert analyses the extent to which human rights law is able to provide protection for nomadic peoples to perpetuate their own way of life and culture The book questions whether the current human rights regime is able to protect nomadic peoples and highlights the lacuna that currently exists in international human rights law in relation to nomadic peoples It goes on to propose avenues for the development of specific rights for nomadic peoples offering a new reading on freedom of movement land rights and development in the context of nomadism

Settling for Less Lachlan McNamee, 2023-01-17 Why countries colonize the lands of indigenous people Over the past few centuries vast areas of the world have been violently colonized by settlers But why did states like Australia and the United States stop settling frontier lands during the twentieth century At the same time why did states loudly committed to decolonization like Indonesia and China start settling the lands of such minorities as the West Papuans and Uyghurs Settling for Less traces this bewildering historical reversal explaining when and why indigenous peoples suffer displacement at the hands of settlers Lachlan McNamee challenges the notion that settler colonialism can be explained by economics or racial ideologies He tells a more complex story about state building and the conflicts of interest between indigenous peoples states and settlers Drawing from a rich array of historical evidence McNamee shows that states generally colonize frontier areas in response to security concerns Elite schemes to populate contested frontiers with loyal settlers however often fail As societies grow wealthier and cities increasingly become magnets for migration states ultimately lose the power to settle frontier lands Settling for Less uncovers the internal dynamics of settler colonialism and the diminishing power of colonizers in a rapidly

urbanizing world Contrasting successful and failed colonization projects in Australia Indonesia China and beyond this book demonstrates that economic development by thwarting colonization has proven a powerful force for indigenous self determination

**No Man's Land** George Monbiot,2003 This book tells the story of George Monbiot's journeys among some of the tribal peoples of East Africa showing how they are confronting the forces which threaten them In northern Kenya he saw how bandits equipped by the corrupt governments of both Kenya itself and some of its neighbours have been massacring the nomads driving the survivors into famine zones where first the cattle then the humans die Further south he watched the open savannahs on which the nomads rely being divided up and reduced by ploughing But he also saw that the nomads of East Africa are finding ways to survive All nomads are opportunists and the adaptability the cultural flexibility that opportunism demands means that they are possibly better equipped than any other of the world's traditional peoples to withstand dramatic change
