A Little Matter of Genocide Ward Churchill, 1997 Ward Churchill has achieved an unparalleled reputation as a scholar activist and analyst of indigenous issues in North America Here he explores the history of holocaust and denial in this hemisphere beginning with the arrival of Columbus and continuing on into the present He frames the matter by examining both revisionist denial of the nazi perpetrated Holocaust and the opposing claim of its exclusive uniqueness using the full scope of what happened in Europe as a backdrop against which to demonstrate that genocide is precisely what has been and still is carried out against the American Indians Churchill lays bare the means by which many of these realities have remained hidden how public understanding of this most monstrous of crimes has been subverted not only by its perpetrators and their beneficiaries but by

the institutions and individuals who perceive advantages in the confusion. In particular, he outlines the reasons underlying the United States's 40-year refusal to ratify the Genocide Convention as well as the implications of the attempt to exempt itself from compliance when it finally offered its endorsement. In conclusion, Churchill proposes a more adequate and coherent definition of the crime as a basis for identifying, punishing, and preventing genocidal practices wherever and whenever they occur.

Ward Churchill enrolled Keetoowah Cherokee. He is Professor of American Indian Studies with the Department of Ethnic Studies at the University of Colorado Boulder. A member of the American Indian Movement since 1972, he has been a leader of the Colorado chapter for the past fifteen years. Among his previous books have been *Fantasies of a Master Race*, *Struggle for the Land*, *Since Predator Came*, and *From a Native Son*.

Conservation Fallout John Wills, 2012-08-15. An unprecedented look at nuclear politics in California. Vehement, widespread opposition accompanied the rise of the U.S. nuclear industry during the 1960s and 1970s. In *Conservation Fallout*, John Wills examines one of the most controversial atomic projects of the period: Pacific Gas and Electric Company's decision to build its premier nuclear power plant at Diablo Canyon, a relatively unsettled, biologically rich, and especially scenic part of the central California coastline. Two competing visions of California emerged while the plant underwent construction. Environmentalists used Diablo as a symbol of impending ecological doomsday, while PG&E envisioned it as the model that would usher in a new age of energy production. The Sierra Club almost disbanded over whether to condone or protest the reactor project. Divisions also emerged in the local community as residents and politicians, enticed by the promise of cheap electricity and lucrative tax revenues, found themselves pitted against others who feared the dangers of radiation in their own backyards. The controversy intensified when a fault line was discovered within three miles of the plant. Grassroots groups, The Mothers for Peace, a local women's group, and The Abalone Alliance, a statewide nonviolent direct action organization, did their utmost to stop the plant from going on line. In 1979, an Alliance rally in San Francisco attracted 25,000 people, while 40,000 others gathered in San Luis Obispo. During a two-week-long blockade of the Diablo plant in 1981, over 1,900 activists were jailed, the largest arrest in the history of American antinuclear protest. Despite its significance in the history of twentieth-century environmental issues and the continuing debate over the safety of nuclear power, the full story of Diablo Canyon has not been told until now. Wills bases his account on extensive interviews with the individuals involved as well as on the archives of the Sierra Club, several protest organizations, public agencies, PG&E, and others. The result is an engaging, balanced examination of nuclear politics in California. By focusing on one of the last wild places in the state and its transformation into a major technological center, and on the evolution and strategies of the little studied grassroots protest groups determined to protect California and resist the spread of nuclear technology, Wills has made a major contribution to our understanding of America's nuclear age.

The Atomic Energy Commission under Nixon G. Seaborg, B. Loeb, 2016-04-30. In this revealing book, Nobel

Laureate Glenn T Seaborg tells what it was like to be chairman of the Atomic Energy Commission during the Nixon presidency He draws extensively from his meticulously kept diary enabling the reader to be a fly on the wall during meetings with Nixon Henry Kissinger and other key policy makers During the Nixon period the debate over how to deal with the Soviets on nuclear issues and arms control remained central On the domestic scene efforts to promote and regulate the growth of a nuclear power industry were complicated by a rising tide of environmental protest Dr Seaborg describes how the Atomic Energy Commission shorn of much of the political immunity of its early years sought to maintain its programmes and ultimately its very existence while besieged by competing pressures from the White House other government agencies anti nuclear activists industry state governments and Congress
