Macgregor Wise, 2016-05-13 Back in the 1980s Jean Baudrillard wrote that public space was collapsing due to a double obscenity The most intimate operation of your life becomes the potential grazing ground of the media The entire universe also unfolds unnecessarily on your home screen He termed this the ecstasy of communication But today your everyday life is not just the potential grazing ground of the media but of anyone with a camera and the entire universe unfolds not just at home but in the palm of your hand virtually anywhere you travel Bringing together a transdisciplinary team of leading scholars and artists from North America Europe and Asia this volume documents and theorizes this new visibility It focuses on the proliferation of a range of new visual technologies examining questions of subjectivity agency and surveillance as well as mapping and theorizing new practices of visibility within this new visual assemblage *New Visualities New Technologies* addresses the pressing need for the conceptual understanding of new forms of seeing looking presenting and hiding *Hydraulics and Fluid Mechanics* Richard Silvester, 2014-05-16 *Hydraulics and Fluid Mechanics* is a collection of papers from the Proceedings of the First Australian Conference held at the University of Western Australia on December 6 13 1962 at Nedlands Australia This book deals with the science of hydraulics and fluid mechanics in their practical uses in industry and research In special situations when high pressure oil is used in mechanical equipment hydraulic lock is preferred for valve control This book reviews the pressure drop in the pneumatic transfer of granular solids in a pipe where a formula is derived to determine the pressure drop when using either a straight or bent pipe This text also discusses the improvements on the cavitation performance of flow pumps by using prerotation at design points The construction of a dam in Tasmania provides another study on the behavior of rock fill slopes subjected to seepage Here the book analyzes the hydraulic forces acting on the rock particles and explains theories on the derivation of the dynamic equation for spatially varied flow with increasing discharge on a steep slope The book also examines the concept of critical depth in spatially varied flow with increasing discharge on a steep slope This book investigates the use of a computer model designed to determine the methods of draining flooded farmlands either through hydraulically or electrically operated drainage systems This text

also evaluates the cost of constructing a project This collection is suitable for people in the field of applied mathematics physics and engineering
