Justice Sjors Ligthart, 2022-09-01 Emerging neurotechnology offers increasingly individualised brain information enabling

researchers to identify mental states and content When accurate and valid these brain reading technologies also provide data

that could be useful in criminal legal procedures such as memory detection with EEG and the prediction of recidivism with fMRI Yet unlike in medicine individuals involved in criminal cases will often be reluctant to undergo brain reading procedures This raises the question of whether coercive brain reading could be permissible in criminal law Coercive Brain Reading in Criminal Justice examines this question in view of European human rights the prohibition of ill treatment the right to privacy freedom of thought freedom of expression and the privilege against self incrimination The book argues that at present the established framework of human rights does not exclude coercive brain reading It does however delimit the permissible use of forensic brain reading without valid consent This cautionary cutting edge book lays a crucial foundation for understanding the future of criminal legal proceedings in a world of ever advancing neurotechnology *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress.
