Lagergren,Kathleen A. Pitt,1977 Policing European Metropolises Elke Devroe,Adam Edwards,Paul Ponsaers,2017-02-03
Understanding the politics of security in city regions is increasingly important for the study of contemporary policing This book argues that national and international governing arrangements are being outflanked by various transnational threats including the cross border terrorism of the attacks on Paris in 2015 and Brussels in 2016 trafficking in people narcotics and armaments cybercrime the deregulation of global financial services and environmental crime Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges and considers problems of and for policing in city regions in the European Union and its single market Bringing together experts from across the continent Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country This book will be of value to police researchers in Europe and abroad as well as postgraduate students with an interest in policing and urban policy *World Police & Paramilitary Forces* John Andrade,2016-01-09 **Library Book Catalog** United States. K. Greener,W. J. Fish,2014-11-27 This book examines international efforts to provide security in post conflict sites and explains why internal security should be given precedence in statebuilding endeavours The work begins by exploring the evolution of security sectors in mature liberal democratic states before examining the attempts of such states to accelerate that evolutionary process in post conflict sites through statebuilding and security sector reform These discussions suggest interestingly different answers to the question of who should provide for internal security in international operations When considering mature states there are both practical and normative reasons as to why internal security has become the sole domain of police with military forces being excluded from internal affairs In peace and stability operations on the other hand difficulties with utilising police personnel have led to military forces being required to play internal security roles This tension is investigated further through detailed case studies of three recent missions Afghanistan Timor Leste and Solomon Islands These case studies both reinforce and augment the practical and normative reasons for

ensuring that internal security remains the domain of police This then impacts upon peace and stability operations in two important ways If we are to provide enduring security in post conflict sites we should both i prioritise internal security agencies in security sector reform efforts and ii prioritise ways of enabling police to play internal security roles in the contributing mission This book will be of much interest to students of statebuilding peace and conflict studies military studies police studies historical sociology security studies and IR in general **Law Enforcement Library** Lewis & Clark Library System. Saskia Bayerl,Ruža Karlović,Babak Akhgar,Garik Markarian,2017-05-24 This book provides a view into the multi dimensional and multi contextual nature of community policing It brings together important conceptual discussions as well as numerous case studies and real life examples of European community policing practices It further offers insights into how the primarily locally focused concept of community policing fits into an increasingly interconnected world Our book is intended for professionals working in community policing academics and policymakers developing community policing procedures In addition the book aims to provide information for readers who are new to the subject of community policing The wide range of examples and case studies make it also an excellent resource for teaching materials *Special Committee on Criminal Justice Standards and Goals* Wisconsin.
