## **Policing Rio De Janeiro Repression :**

*Policing Rio de Janeiro*, 1993-09 When in 1808 members of the Portuguese royal entourage arrived in Rio de Janeiro the capital of a colony most had previously known only through administrative reports and balance sheets they encountered a hostile and dangerous population that included a large number of African slaves One of the institutions they brought from Lisbon was the General Intendancy of Police which was the foundation on which the city's police institutions were built The government met the challenge of bringing the inhabitants of Rio de Janeiro under control with a repressive apparatus that grew along with the problem it was created to solve Policing Rio de Janeiro is a history of one of the fundamental institutions of the modern world through which the power of the state intrudes on public space to control and direct behavior It is also a study of the way people resisted the repressive arm of the state including heretofore unreported cases of slave rebellion as well as forms of everyday resistance The author shows how the historical development of the police of Rio de Janeiro through a dialectic of repression and resistance was part of a more general transition from the traditional application of control through private hierarchies to the modern exercise of power through public institutions Using the rich records which include internal correspondence and official reports of the police system and its civilian counterparts the judicial and jail systems the author explores the point at which repression and resistance collided on the squares streets and back alleys of Brazil's capital city The resulting disturbances served as a catalyst for the formation of institutions and procedures that provided a veneer of modernity over traditional attitudes and relationships protecting and strengthening them In a conceptual context that includes the ideas of Foucault Weber and Gramsci the author goes beyond institutional history to examine the changing social conditions of Rio de Janeiro and the exercise of power by its elites Policing Rio de Janeiro Thomas H.

Holloway, 1993 It is also a study of the way people resisted the repressive arm of the state including heretofore unreported cases of slave rebellion as well as forms of everyday resistance The author shows how the historical development of the police of Rio de Janeiro through a dialectic of repression and resistance was part of a more general transition from the traditional application of control through private hierarchies to the modern exercise of power through public institutions Using the rich records which include internal correspondence and official reports of the police system and its civilian counterparts the judicial and jail systems the author explores the point at which repression and resistance collided on the squares streets and back alleys of Brazil's capital city **Policing the Global South** Danielle Watson, Sara N.

not aligned to Northern ideological positions and specific to the non Northern context Such shifts draw attention to the expanse of spaces beyond Northern centres rife with challenges unlike any specific to those experienced or conceptualised by scholars from the Global North with an applied Northern criminological lens Applying a postcolonial lens to empirical knowledge from country specific cases in former colonies in Africa Asia the Caribbean the Pacific and Latin America this book examines how policing issues not aligned to Northern ideological positions and specific to non Northern contexts are addressed The primary purpose is to share innovations in the field of policing service provision threats to security crime responses justice and international trends developed in postcolonial developing country contexts Given the aim of the book and the contributors own research on issues of policing across the globe it discusses themes including but not limited to the colonial legacies and their impact on policing how plural regulatory systems and partnerships are navigated by the police the linkages between access to justice community perceptions and police legitimacy innovations and challenges in organisational reform crime prevention and community partnerships and the expanding roles of police organisations in the Global South While each chapter presents a policing issue in a country within a specific part of the Global South the book highlights how important it is to frame responses based on contextual realities informed by an awareness of the past and present with a goal of informing the future Delivering a much needed introduction to those specialising in policing in developing countries this book is invaluable reading for academics and students of criminology criminal justice governance policy and IR as well as professionals in policing organizations across the globe

Police and Society in Brazil Vicente Riccio, Wesley G. Skogan, 2017-09-22

In Brazil where crime is closely associated with social inequality and failure of the criminal justice system the police are considered by most to be corrupt inefficient and violent especially when occupying poor areas and they lack the widespread legitimacy enjoyed by police forces in many nations in the northern hemisphere This text covers hot button issues like urban pacification squads gangs and drugs as well as practical topics such as policy dual civil and military models and gender relations The latest volume in the renowned Advances in Police Theory and Practice Series Police and Society in Brazil fills a gap in English literature about policing in a nation that currently ranks sixth in number of homicides It is a must read for criminal justice practitioners as well as students of international policing

A Southern Criminology of Violence, Youth and Policing Roxana Pessoa Cavalcanti, 2020-03-19

A Southern Criminology of Violence Youth and Policing examines public experiences of insecurity and the social impacts of security programmes that aim to address violence in Brazil This book contributes to the emerging field of southern criminology by engaging with the perils faced by people living in favelas in Brazil and critically investigating the discourse of state actors It combines original ethnographic data with critical analysis to expand understandings of violence and control in urban and postcolonial contexts This study challenges dominant practices and notions of security and control Its objective is to decolonise knowledge and shed light on issues relating to policing coercion and the great socioeconomic historical and spatial inequalities that shape the lives of millions of people in the Global

South The findings of this book expose the exacerbation of social problems by the expansion of the penal and crime industry unsettling the applicability and universalism of mainstream managerial criminology The evidence reveals that new modes of securitisation have not addressed long standing issues of sexism racism classism and brutalisation in the police Moreover through the increasing use of methods of control and incarceration security programmes have failed to prevent diverse forms of violence and challenge the expansion of organised crime Instead they have exacerbated the inequalities that affect the most marginalised populations Written in a clear and direct style this book will appeal to students and scholars in criminology sociology cultural studies social theory and those interested in learning about the social injustices that exists in the Global South *Policing and Contemporary Governance* William Garriott, 2013-06-25 What is it that police and policing actually do What are the effects How are these effects mediated and experienced by different people at different times and in different contexts This volume draws attention to the centrality of police and policing to the project of governance and the experience of being human in the contemporary world *The Global Making of Policing* Jana Hönke, Markus-Michael Müller, 2016-08-12 This edited volume analyses the global making of security institutions and practices in our postcolonial world The volume will offer readers the opportunity to gain a deeper understanding of the global making of how security is thought of and practiced from US urban policing diaspora politics and transnational security professionals to policing encounters in Afghanistan Palestine Colombia or Haiti It critically examines and decentres conventional perspectives on security governance and policing In doing so the book offers a fresh analytical approach moving beyond dominant one sided perspectives on the transnational character of security governance which suggest a diffusion of models and practices from a Western centre to the rest of the globe Such perspectives omit much of the experimenting and learning going on in the post colony as well as the active agency and participation of seemingly subaltern actors in producing and co constituting what is conventionally thought of as Western policing practice knowledge and institutions This is the first book that studies the truly global making of security institutions and practices from a postcolonial perspective by bringing together highly innovative in depth empirical cases studies from across the globe It will be of particular interest to students and scholars interested in International Relations and Global Studies critical Security Studies Criminology and Postcolonial Studies **Global Perspectives in Policing and Law Enforcement** Jospeter M. *Policing Insecurity* Niels Uildriks,2009-04-16 Profound distrust commonly characterizes not only the relationship between citizens and state institutions but also social as well as inter and intra state relations This impacts the effectiveness and quality of the service provided by state institutions The degree to which police and judicial reforms are able to generate trust on these fronts is therefore an important yardstick to judge their relevance under varying circumstances of post authoritarian rule but this question is largely ignored in the current literature on policing and reform From this perspective Policing Insecurity Police Reform Security and Human Rights in Latin America suggests an agenda of future reforms for the region drawing and building upon policing reform experiences throughout the Latin America looking at issues such as impunity professionalization community policing as well as accountability and training of the police By explicitly linking issues of state social trust democratic transition human rights and security these case studies provide a basis for the wider discussion in the book about prerequisites for the success or failure of police reforms thus adding to our empirical and theoretical knowledge in these areas and introducing an important dimension to the literature on police reform security and human rights

**Violence and Crime in Latin America** Gema Santamaría, David Carey, 2017-02-21

According to media reports Latin America is one of the most violent regions in the world a distinction it held throughout the twentieth century The authors of *Violence and Crime in Latin America* contend that perceptions and representations of violence and crime directly impact such behaviors creating profound consequences for the political and social fabric of Latin American nations Written by distinguished scholars of Latin American history sociology anthropology and political science the essays in this volume range from Mexico and Argentina to Colombia and Brazil in the twentieth and twenty first centuries addressing such issues as extralegal violence in Mexico the myth of indigenous criminality in Guatemala and governments selective blindness to violent crime in Brazil and Jamaica The authors in this collection examine not only the social construction and political visibility of violence and crime in Latin America but the justifications for them as well Analytically and historically these essays show how Latin American citizens have sanctioned criminal and violent practices and incorporated them into social relations everyday practices and institutional settings At the same time the authors explore the power struggles that inform distinctions between illegitimate versus legitimate violence *Violence and Crime in Latin America* makes a substantive contribution to understanding a key problem facing Latin America today In its historical depth and ethnographic reach this original and thought provoking volume enhances our understanding of crime and violence throughout the Western Hemisphere

*The Killing Consensus* Graham Denyer Willis, 2015-03-21

We hold many assumptions about police work that it is the responsibility of the state or that police officers are given the right to kill in the name of public safety or self defense But in *The Killing Consensus* Graham Denyer Willis shows how in São Paulo Brazil killing and the arbitration of normal killing in the name of social order are actually conducted by two groups the police and organized crime both operating according to parallel logics of murder Based on three years of ethnographic fieldwork Willis's book traces how homicide detectives categorize two types of killing the first resulting from resistance to police arrest which is often broadly defined and the second at the hands of a crime family known as the Primeiro Comando da Capital PCC Death at the hands of police happens regularly while the PCC's centralized control and strict moral code among criminals has also routinized killing ironically making the city feel safer for most residents In a fractured urban security environment where killing mirrors patterns of inequitable urbanization and historical exclusion along class gender and racial lines Denyer Willis's research finds that the city's cyclical periods of peace and violence can best be understood through an unspoken but mutually observed consensus on the right to kill This consensus hinges on common notions and street level practices of who

can die where how and by whom revealing an empirically distinct configuration of authority that Denyer Willis calls sovereignty by consensus

**More Money, More Crime** Marcelo Bergman, 2018-05-07 While worldwide crime is declining overall criminality in Latin America has reached unprecedented levels that have ushered in social unrest and political turmoil Despite major political and economic gains crime has increased in every Latin American country over the past 25 years currently making this region the most crime ridden and violent in the world Over the past two decades Latin America has enjoyed economic growth poverty and inequality reduction rising consumer demand and spreading democracy but it also endured a dramatic outbreak of violence and property crimes In *More Money More Crime* Marcelo Bergman argues that prosperity enhanced demand for stolen and illicit goods supplied by illegal rackets Crime surged as weak states and outdated criminal justice systems could not meet the challenge posed by new profitably criminal enterprises Based on large scale data sets including surveys from inmates and victims Bergman analyzes the development of crime as a business in the region and the inability and at times complicity of state agencies and officers to successfully contain it While organized crime has grown Latin American governments have lacked the social vision to promote sustainable upward mobility and have failed to improve the technical capacities of law enforcement agencies to deter criminality The weak state responses have only further entrenched the influence of criminal groups making them all the more difficult to dismantle *More Money More Crime* is a sobering study that foresees a continued rise in violence while prosperity increases unless governments develop appropriate responses to crime and promote genuine social inclusion

**Punishment in Paradise** Peter M. Beattie, 2015-04-20 Throughout the nineteenth century the idyllic island of Fernando de Noronha which lies two hundred miles off Brazil's northeastern coast was home to Brazil's largest forced labor penal colony In *Punishment in Paradise* Peter M Beattie uses Noronha as a case study to understand nineteenth century Brazil's varied social and cultural values especially in relation to justice class color civil condition human rights and labor As Brazil's slave population declined after 1850 the use of colonial era disciplinary practices at Noronha such as flogging and forced labor stoked anxieties about human rights and Brazil's international image Beattie contends that the treatment of slaves convicts and other social categories subject to coercive labor extraction were interconnected and that reforms that benefitted one of these categories made them harder to deny to others In detailing Noronha's history and the end of slavery as part of an international expansion of human rights Beattie places Brazil firmly in the purview of Atlantic history

**Management as Critical Museum Practice** Cara Krmpotich, Alice Stevenson, 2024-07-22 There is a common misconception that collections management in museums is a set of rote procedures or technical practices that follow universal standards of best practice This volume recognises collections management as a political critical and social project involving considerable

intellectual labour that often goes unacknowledged within institutions and in the fields of museum and heritage studies Collections Management as Critical Museum Practice brings into focus the knowledges value systems ethics and workplace pragmatics that are foundational for this work Rather than engaging solely with cultural modifications such as Indigenous care practices the book presents local knowledge of place and material which is relevant to how collections are managed and cared for worldwide Through discussion of varied collection types management activities and professional roles contributors develop a contextualised reflexive practice for how core collections management standards are conceptualised negotiated and enacted Chapters span national museums in Brazil and Uganda to community led heritage work in Malaysia and Canada they explore complexities of numbering digitisation and description alongside the realities of climate change global pandemics and natural disasters The book offers a new definition of collections management travelling from what is done to care for collections to what is done to care for collections and their users Rather than use being an end goal it emerges as a starting point to rethink collections work      *Policing Freedom* Martine Jean, 2023-08-17 Explores the transformation of punishment in nineteenth century Brazil and its intersection with changes in labor relations in the Atlantic World
