## **Policing And Program Evaluation:**

**Policing and Program Evaluation** Kent R. Kerley, 2005 Program evaluation is of vital importance for practitioners and researchers associated with policing. It goes without saying that we work in an era where the ultimate question asked of policing programs as well as criminal justice programs in general is do they work. Thus it is crucial that policing researchers and practitioners know how to conduct scientific evaluations of their programs. *Policing and Program Evaluation* represents the first text to combine the how to of program evaluation with specific information about contemporary policing programs. In *Policing and Program Evaluation* Dr Kent R Kerley and his colleagues provide an in depth exploration of the process of program evaluation in policing. Leading scholars from universities and research organizations discuss recently completed evaluations of a plethora of different programs. The volume includes evaluations of community policing programs and training institutes, firearms suppression programs, gang units, crime prevention programs, and drug task forces. Instead of focusing solely on their findings, the authors focus on how they conducted their evaluations and the lessons they learned in the process. This new volume should prove useful to students, researchers, and practitioners of policing. Readers will learn about the do's and don'ts of program evaluation while simultaneously learning specific information about policing programs. [Practical Program Evaluation for Criminal Justice](#) Gennaro Vito, George Higgins, 2014-06-10 *Practical Program Evaluation for Criminal Justice* shows readers how to apply the principles of fiscal responsibility, accountability, and evidence-based practice to criminal justice reform plans. Unlike other policy-based texts which tend to focus more on implementation than assessment, this book provides applicable step-by-step instruction on determining an initiative's necessity prior to its adoption, reducing the risk of wasting resources as well as how to accurately gauge its effectiveness during initial roll-out stages. The book gradually introduces basic data analysis procedures and statistical techniques which, once mastered, can be used to prove or disprove a program's worth. Lastly, the book introduces the types of stakeholders who should review evaluation results for quick action as well as how to best structure reports to ensure their buy-in. **Police Program Evaluation** Larry T.
