The Last Neighborhood Cops Gregory Holcomb Umbach, 2011 In recent years community policing has transformed American law enforcement by promising to build trust between citizens and officers Today three quarters of American police departments claim to embrace the strategy But decades before the phrase was coined the New York City Housing Authority Police Department HAPD had pioneered community based crime fighting strategies *The Last Neighborhood Cops* reveals the forgotten history of the residents and cops who forged community policing in the public housing complexes of New York City during the second half of the twentieth century Through a combination of poignant storytelling and historical analysis Fritz Umbach draws on buried and confidential police records and voices of retired officers and older residents to help explore the rise and fall of the HAPD's community based strategy while questioning its tactical effectiveness The result is a unique perspective on contemporary debates of community policing and historical developments chronicling the influence of poor and working class populations on public policy making

The Police and Society Victor E. Kappeler, Brian P. Schaefer, 2018-09-11 The most productive route to understanding the dynamic interrelationships of the police with society is to examine the recurring central themes in policing The articles in this anthology represent some of the best scholarship on compelling issues Selected for both their complementary and competing natures the articles serve as touchstones for one another often challenging previous conceptions Many selections question the methods by which information was acquired the practices that evolved from that information and the background assumptions behind the construction of practices Some of the many issues and conflicts addressed in this collection include What is the nature of the police role and function Who benefits from police service Who is harmed How are public safety and social order secured while maintaining individual rights and freedoms To what extent do our expectations about the police and society reflect our values and demands Are the police a society unto themselves Is policing at a critical crossroads The editors assembled this volume with the goal of helping readers to identify underlying assumptions to dissect how values influence inquiries and to discover connections A better understanding of the role of the police in society provides a solid foundation for assessing the efficacy of future police society relationships

An Introduction to American Policing Dennis J. Stevens, 2017-05-08 *An Introduction to American Policing* Second Edition connects the US criminal justice system criminology and law enforcement knowledge to the progress of the police community It is the perfect resource for a Police Science course

Police in a Multicultural Society David E. Barlow, Melissa Hickman Barlow, 2018-04-10 Social political and economic relationships played key roles in the historical development of the police The authors present policing strategies from the vantage points of marginalized communities and emphasize the intersection of attitudes about class race ethnicity gender and sexual orientation with policies Police practices cannot be class neutral in a class society nor can they be race neutral or gender neutral in a racist sexist and heterosexist society The key to understanding the relationship between the police and society is to think critically about the role of power

and interests The second edition includes a new chapter in the section on the police and rebellion covering recent events There is also a new chapter on Latino a police officers and an expanded chapter on LGBTQ police officers Without meaningful social change toward greater justice police reforms such as community policing and training in cultural diversity will fall short of creating an institution characterized by fairness and equality for all members of society A clear view of history is essential for understanding the challenges a more diverse police force faces in today s multicultural environment

No Place on the Corner Jan Haldipur, 2018-11-27 Winner 2019 Goddard Riverside Stephan Russo Book Prize for Social Justice given by the Goddard Riverside Community Center The impact of stop and frisk policing on a South Bronx community What s it like to be stopped and frisked by the police while walking home from the supermarket with your young children How does it feel to receive a phone call from your fourteen year old son who is in the back of a squad car because he laughed at a police officer How does a young person of color cope with being frisked several times a week since the age of 15 These are just some of the stories in No Place on the Corner which draws on three years of intensive ethnographic fieldwork in the South Bronx before and after the landmark 2013 Floyd v City of New York decision that ruled that the NYPD s controversial stop and frisk policing methods were a violation of rights Through riveting interviews and with a humane eye Jan Haldipur shows how a community endured this aggressive policing regime Though the police mostly targeted younger men of color Haldipur focuses on how everyone in the neighborhood mothers fathers grandparents brothers and sisters even the district attorney s office was affected by this intense policing regime and thus shows how this South Bronx community as a whole experienced this collective form of punishment One of Haldipur s key insights is to demonstrate how police patrols effectively cleared the streets of residents and made public spaces feel off limits or inaccessible to the people who lived there In this way community members lost the very street corner culture that has been a hallmark of urban spaces This profound social consequence of aggressive policing effectively keeps neighbors out of one another s lives and deeply hurts a community s sense of cohesion No Place on the Corner makes it hard to ignore the widespread consequences of aggressive policing tactics in major cities across the United States

Interpreting Policework Roger Grimshaw, Tony Jefferson, 2023-03-31 In the 1980s there existed wide and often acrimonious disagreement over the purposes and objectives of police organizations the ways in which their activities were structured and their relations with the wider society Interpreting policework requires a rounded conception of policing based on both a thorough critique of the main theoretical trends in police sociology and close familiarity with actual patterns of policing on the streets in the stations and inside the police headquarters where key policies are formulated Originally published in 1987 the achievement of this book is that it combines rigorous theoretical analysis with a wealth of descriptive material drawn from first hand observation of policing and decision making at all levels and thus relates sociological theory to practice and political debate at the time The introduction provides a careful analysis of central theoretical and political strands in police sociology and proposes a new general conception of policework The authors go on to provide vivid illustrations of this conception from the worlds of uniformed unit beat patrols and resident beat officers and from the fora in which policy for operational practice is considered A final section draws the wider lessons of these concrete analyses for sociological theory and for our understanding of past policy shifts from one form of beatwork to another and spells out the radical implications of the study for the political debate on the future of policing Interpreting Policework thus had relevance to students and researchers in police studies sociology public policy and the law at the time and will still be of historical interest today The authors are experienced researchers practised in investigating a wide range of criminological and social control issues

Policing by the Public Joanna

Shapland, Jon Vagg, Originally published in 1988 *Policing by the Public* opened up an entirely new field within criminology and the sociology of deviance. The authors focus on the nature of informal social control in both villages and urban centres to show the kinds of policing people do for themselves within their communities in an endeavour to curb crime and deviance. Taking as the basis for their study both a rural and an urban community, Joanna Shapland and Jon Vagg are able to counter many of the existing myths about these areas. Beginning with a description of the kinds of problems people experience in their own neighbourhoods, they explore who watches what, who intervenes, and the stereotypes of troublesome people and situations that emerge. This study sheds important light on the nature of concern and fear about crime and disorder, the use people want to make of the police, and significantly, the kind of policing they get. *Policing by the Public* made a major contribution to contemporary international debate about informal mechanisms of social control at the time. It offered a new approach to thinking about policing that will still be of interest not only to criminologists, sociologists, police, and policymakers but also to anyone who is curious about how his or her area actually worked. Down, Out, and Under Arrest Forrest Stuart, 2016-08-02

Forrest Stuart gives us a new framework for understanding life in criminalized communities throughout America. The idea of community policing and of stop and frisk and broken windows is just part of the picture which includes people on both sides of the issue of keeping order in Skid Row communities. Stuart's is a dramatic demonstration of how to understand the daily realities of America's most truly disadvantaged: an understanding that requires a sharp focus on the pervasive role and impact of the police. Policing zero tolerance models in particular is reshaping urban poverty and marginalization in 21st century America. Stuart immersed himself for several years in the notorious homeless capital of America which is to say Skid Row in Los Angeles. It has the largest concentration of standing police forces anywhere in the United States. On their side, the police practice what Stuart calls therapeutic policing: a form of virtual social work that is designed to cure the poor of individual pathologies. On the side of the homeless, Stuart finds a cunning set of techniques for evading police contact which he dubs cop wisdom and which the poor use for intensifying resistance to roustings by the police. The police are tasked with day to day management of the growing numbers of citizens falling through the holes in the threadbare social safety net. We see daily patrol practices and routines that amount to hyper policing in skid row districts. The continuous threat of punishment aims to steer homeless individuals away from self destructive behaviors while providing incentives to drug recovery, employment and life skills in nearby meta shelters. Minority upheavals now underway across America underscore the divide between cops and the urban poor, almost all of whom are black or Latino. Stuart joins Alice Goffman in revealing the underlying and often tragic dynamics.
